

# ASCC2 (5S8) Mouse Monoclonal antibody ASCC2 (5S8) Mouse Monoclonal antibody

Catalog # AP93895

# **Specification**

## ASCC2 (5S8) Mouse Monoclonal antibody - Product Information

Application WB, IF
Primary Accession Q9H118
Reactivity Rat, Human, Mouse
Clonality Monoclonal
Calculated MW 86360

### ASCC2 (5S8) Mouse Monoclonal antibody - Additional Information

#### **Gene ID 84164**

#### **Other Names**

Activating signal cointegrator 1 complex subunit 2, ASC-1 complex subunit p100, Trip4 complex subunit p100, ASCC2, ASC1P100, RQT3 {ECO:0000303|PubMed:32099016}

#### **Dilution**

WB~~1:1000 IF~~1:50~200

## **Storage Conditions**

-20°C

# ASCC2 (5S8) Mouse Monoclonal antibody - Protein Information

## Name ASCC2

Synonyms ASC1P100, RQT3 {ECO:0000303|PubMed:32099

# **Function**

Ubiquitin-binding protein involved in DNA repair and rescue of stalled ribosomes (PubMed:<a href="http://www.uniprot.org/citations/29144457" target="\_blank">29144457</a>, PubMed:<a href="http://www.uniprot.org/citations/32099016" target="\_blank">32099016</a>, PubMed:<a href="http://www.uniprot.org/citations/32579943" target="\_blank">32579943</a>, PubMed:<a href="http://www.uniprot.org/citations/36302773" target="\_blank">36302773</a>). Plays a role in DNA damage repair as component of the ASCC complex (PubMed:<a href="http://www.uniprot.org/citations/29144457" target="\_blank">29144457</a>). Recruits ASCC3 and ALKBH3 to sites of DNA damage by binding to polyubiquitinated proteins that have 'Lys-63'-linked polyubiquitin chains (PubMed:<a href="http://www.uniprot.org/citations/29144457" target="\_blank">29144457</a>). Part of the ASC-1 complex that enhances NF-kappa-B, SRF and AP1 transactivation (PubMed:<a href="http://www.uniprot.org/citations/12077347" target="\_blank">12077347</a>). Involved in activation of the ribosome quality control (RQC) pathway, a pathway that degrades nascent peptide chains during problematic translation (PubMed:<a href="http://www.uniprot.org/citations/32099016" target=" blank">32099016</a>/a>,

PubMed:<a href="http://www.uniprot.org/citations/32579943" target="\_blank">32579943</a>, PubMed:<a href="http://www.uniprot.org/citations/36302773" target="\_blank">36302773</a>). Specifically recognizes and binds RPS20/uS10 ubiquitinated by ZNF598, promoting recruitment of the RQT (ribosome quality control trigger) complex on stalled ribosomes, followed by disassembly of stalled ribosomes (PubMed:<a href="http://www.uniprot.org/citations/36302773" target=" blank">36302773</a>).

### **Cellular Location**

Nucleus. Nucleus speckle Note=Colocalizes with the spliceosomal components PRPF8 and SNRNP200/BRR2 in nuclear foci when cells have been exposed to alkylating agents that cause DNA damage. Colocalizes with RNF113A and 'Lys-63'-linked polyubiquitinated proteins, ALKBH3 and ASCC3 in nuclear foci when cells have been exposed to alkylating agents that cause DNA damage.

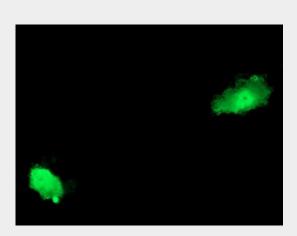

Tissue Location Ubiquitous..

# ASCC2 (5S8) Mouse Monoclonal antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

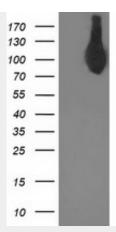

### ASCC2 (5S8) Mouse Monoclonal antibody - Images

Anti-ASCC2 mouse monoclonal antibody (AP93895) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY ASCC2.

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ASCC2 (Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ASCC2. Positive lysates (100ug) and (20ug) can be purchased separately from biodragon.
