

#### CXCL10/IP10 Rabbit pAb

CXCL10/IP10 Rabbit pAb Catalog # AP94832

### **Specification**

#### CXCL10/IP10 Rabbit pAb - Product Information

Application
Primary Accession
Reactivity
Host
Clonality
Calculated MW

IHC-P, IHC-F, IF, E
P17515
Rat, Human, Mouse
Rabbit
Polyclonal
10789

### CXCL10/IP10 Rabbit pAb - Additional Information

#### **Gene ID 15945**

#### **Other Names**

C-X-C motif chemokine 10, 10 kDa interferon gamma-induced protein, Gamma-IP10, IP-10, C7, Interferon-gamma induced protein CRG-2, Small-inducible cytokine B10, Cxcl10, Crg2, Ifi10, Inp10, Scyb10

### **Dilution**

<span class ="dilution\_IHC-P">IHC-P~~N/A</span><br \> <span class
="dilution\_IHC-F">IHC-F~~N/A</span><br \> <span class
="dilution\_IF">IF~~1:50~200</span><br \> <span class ="dilution\_E">E~~N/A</span>

#### **Storage**

Store at -20 °C for one year. Avoid repeated freeze/thaw cycles. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 °C.

### CXCL10/IP10 Rabbit pAb - Protein Information

## Name Cxcl10

Synonyms Crg2, Ifi10, Inp10, Scyb10

#### **Function**

Pro-inflammatory cytokine that is involved in a wide variety of processes such as chemotaxis, differentiation, and activation of peripheral immune cells, regulation of cell growth, apoptosis and modulation of angiostatic effects (By similarity) (PubMed:<a

href="http://www.uniprot.org/citations/28623423" target="\_blank">28623423</a>). Plays thereby an important role during viral infections by stimulating the activation and migration of immune cells to the infected sites (PubMed:<a href="http://www.uniprot.org/citations/18624292" target="\_blank">18624292</a>, PubMed:<a href="http://www.uniprot.org/citations/19017990" target="\_blank">19017990</a>, PubMed:<a href="http://www.uniprot.org/citations/28468883" target="\_blank">28468883</a>). Mechanistically, binding of CXCL10 to the CXCR3 receptor activates G protein-mediated signaling and results in downstream activation of phospholipase C-

dependent pathway, an increase in intracellular calcium production and actin reorganization. In turn, recruitment of activated Th1 lymphocytes occurs at sites of inflammation (By similarity). Activation of the CXCL10/CXCR3 axis also plays an important role in neurons in response to brain injury for activating microglia, the resident macrophage population of the central nervous system, and directing them to the lesion site. This recruitment is an essential element for neuronal reorganization (PubMed:<a href="http://www.uniprot.org/citations/15456824" target="blank">15456824</a>).

#### **Cellular Location**

Secreted {ECO:0000250|UniProtKB:P02778}.

#### **Tissue Location**

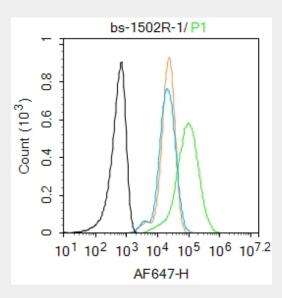

Expressed in the spleen, thymus, lymph nodes and liver (PubMed:8145049). Expressed in astrocytes, microglia, and neurons (PubMed:15456824).

### CXCL10/IP10 Rabbit pAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

### CXCL10/IP10 Rabbit pAb - Images

Blank control: Raw264.7. Primary Antibody (green line): Rabbit Anti-CXCL10/IP10 antibody (AP94832) Dilution: 1  $\mu$ g /10^6 cells; Isotype Control Antibody (orange line): Rabbit IgG . Secondary Antibody: Goat anti-rabbit IgG-AF647 Dilution: 1  $\mu$ g /test. Protocol The cells were fixed with 4% PFA (10min at room temperature)and then permeabilized with 0.1% PBST for 20 min at room temperature. The cells were then incubated in 5%BSA to block non-specific protein-protein interactions for 30 min at room temperature. Cells stained with Primary Antibody for 30 min at room temperature. The secondary antibody used for 40 min at room temperature. Acquisition of
