CNTN1 Antibody (Center) - Additional Information**Gene ID** 1272**Other Names**

Contactin-1, Glycoprotein gp135, Neural cell surface protein F3, CNTN1

Target/Specificity

This CNTN1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 635-662 amino acids from the Central region of human CNTN1.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

CNTN1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

CNTN1 Antibody (Center) - Protein Information**Name** CNTN1

Function Contactins mediate cell surface interactions during nervous system development. Involved in the formation of paranodal axo-glial junctions in myelinated peripheral nerves and in the signaling between axons and myelinating glial cells via its association with CNTNAP1. Participates in oligodendrocytes generation by acting as a ligand of NOTCH1. Its association with NOTCH1 promotes NOTCH1 activation through the released notch intracellular domain (NICD) and subsequent translocation to the nucleus. Interaction with TNR induces a repulsion of neurons and an inhibition of neurite outgrowth (By similarity).

Cellular Location

[Isoform 1]: Cell membrane; Lipid-anchor, GPI- anchor; Extracellular side

Tissue Location

Strongly expressed in brain and in neuroblastoma and retinoblastoma cell lines. Lower levels of expression in lung, pancreas, kidney and skeletal muscle.

CNTN1 Antibody (Center) - Background

CNTN1 is a member of the immunoglobulin superfamily. It is a glycosylphosphatidylinositol

(GPI)-anchored neuronal membrane protein that functions as a cell adhesion molecule. It may play a role in the formation of axon connections in the developing nervous system.
