

MUC-1

Mouse Monoclonal Antibody (Mab)
Catalog # APA095

Specification

MUC-1 - Product Information

Application IHC
Primary Accession P15941
Host Mouse
Clonality Monoclonal
Calculated MW 122102 Da

MUC-1 - Additional Information

Gene ID 4582 Gene Name MUC1

Other Names

Mucin-1, MUC-1, Breast carcinoma-associated antigen DF3, Cancer antigen 15-3, CA 15-3, Carcinoma-associated mucin, Episialin, H23AG, Krebs von den Lungen-6, KL-6, PEMT, Peanut-reactive urinary mucin, PUM, Polymorphic epithelial mucin, PEM, Tumor-associated epithelial membrane antigen, EMA, Tumor-associated mucin, CD227, Mucin-1 subunit alpha, MUC1-NT, MUC1-alpha, Mucin-1 subunit beta, MUC1-beta, MUC1-CT, MUC1, PUM

Dilution

IHC~~1:100~500

Storage Maintain refrigerated at 2-8°C for up to 2

weeks. For long term storage store at -20°C in small aliquots to prevent

freeze-thaw cycles.

Precautions MUC-1 is for research use only and not for

use in diagnostic or therapeutic

procedures.

MUC-1 - Protein Information

Name MUC1

Synonyms PUM

Function The alpha subunit has cell adhesive

properties. Can act both as an adhesion and an anti-adhesion protein. May provide a protective layer on epithelial cells

a protective layer on epithelial cells against bacterial and enzyme attack.
Apical cell membrane; Single-pass type I membrane protein. Note=Exclusively

located in the apical domain of the plasma membrane of highly polarized epithelial cells After endocytosis, internalized and

Cellular Location

Tissue Location

recycled to the cell membrane Located to microvilli and to the tips of long filopodial protusions [Isoform Y]: Secreted. [Mucin-1 subunit beta]: Cell membrane. Cytoplasm. Nucleus. Note=On EGF and PDGFRB stimulation, transported to the nucleus through interaction with CTNNB1, a process which is stimulated by phosphorylation. On HRG stimulation, colocalizes with JUP/gamma-catenin at the nucleus

Expressed on the apical surface of epithelial cells, especially of airway passages, breast and uterus. Also expressed in activated and unactivated T-cells. Overexpressed in epithelial tumors, such as breast or ovarian cancer and also in non-epithelial tumor cells. Isoform Y is expressed in tumor cells only

MUC-1 - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
