

# Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab)

Recombinant Antibody Catalog # APR10258

## **Specification**

# Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) - Product Information

Application FC, Kinetics, Animal Model

Primary Accession
Reactivity
Human
Clonality
Monoclonal
Isotype
IgG1
Calculated MW
145 KDa

# Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) - Additional Information

Target/Specificity IL-6Ra / CD126

**Endotoxin** 

< 0.001EU/ µg,determined by LAL method.

**Conjugation** Unconjugated

**Expression system** 

CHO Cell

## **Format**

Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

# Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) - Protein Information

Name IL6R (HGNC:6019)

#### **Function**

Part of the receptor for interleukin 6. Binds to IL6 with low affinity, but does not transduce a signal (PubMed:<a href="http://www.uniprot.org/citations/28265003" target="\_blank">28265003</a>). Signal activation necessitate an association with IL6ST. Activation leads to the regulation of the immune response, acute-phase reactions and hematopoiesis (PubMed:<a href="http://www.uniprot.org/citations/30995492" target="\_blank">30995492</a>, PubMed:<a href="http://www.uniprot.org/citations/31235509" target="\_blank">31235509</a>). The interaction with membrane-bound IL6R and IL6ST stimulates 'classic signaling', the restricted expression of the IL6R limits classic IL6 signaling to only a few tissues such as the liver and some cells of the immune system. Whereas the binding of IL6 and soluble IL6R to IL6ST stimulates 'trans- signaling'. Alternatively, 'cluster signaling' occurs when membrane- bound IL6:IL6R complexes on transmitter cells activate IL6ST receptors on neighboring receiver cells (Probable).

### **Cellular Location**

[Isoform 1]: Cell membrane {ECO:0000250|UniProtKB:P22272}; Single-pass type I membrane protein [Soluble interleukin-6 receptor subunit alpha]: Secreted

#### **Tissue Location**

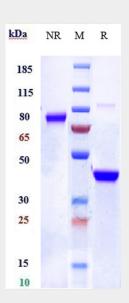

[Isoform 2]: Expressed in peripheral blood mononuclear cells and weakly found in urine and serum. 1%-20% of the total sIL6R in plasma is generated by alternative splicing (PubMed:28060820).

## Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) - Protocols

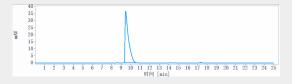

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) - Images

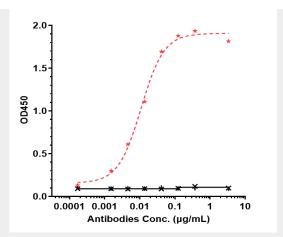

Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 96.9%

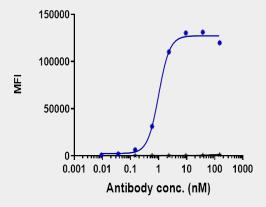

The purity of Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab)is more than 99.34% , determined by SEC-HPLC.

Immobilized human IL 6R His at 2  $\mu$ g/mL can bind Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab)  $\square$ EC50=0.0158  $\mu$ g/mL

Human IL6R CHO cells were stained with Anti-IL-6Ra / CD126 Reference Antibody (vobarilizumab) and negative control protein respectively, washed and then followed by PE and analyzed with FACS, EC320= $1.0090~\rm nM$
