

Anti-Albumin Reference Antibody (Numab patent anti-HSA)
Recombinant Antibody
Catalog # APR10768**Specification****Anti-Albumin Reference Antibody (Numab patent anti-HSA) - Product Information**

Application	FC, Kinetics, Animal Model
Primary Accession	P02768
Reactivity	Human, Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	150 KDa

Anti-Albumin Reference Antibody (Numab patent anti-HSA) - Additional Information**Target/Specificity**

Albumin

Endotoxin

< 0.001EU/ µg, determined by LAL method.

Conjugation

Unconjugated

Expression system

CHO Cell

Format

Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

Anti-Albumin Reference Antibody (Numab patent anti-HSA) - Protein Information**Name** ALB**Function**

Binds water, Ca(2+), Na(+), K(+), fatty acids, hormones, bilirubin and drugs (Probable). Its main function is the regulation of the colloidal osmotic pressure of blood (Probable). Major zinc transporter in plasma, typically binds about 80% of all plasma zinc (PubMed:19021548). Major calcium and magnesium transporter in plasma, binds approximately 45% of circulating calcium and magnesium in plasma (By similarity). Potentially has more than two calcium-binding sites and might additionally bind calcium in a non-specific manner (By similarity). The shared binding site between zinc and calcium at residue Asp-273 suggests a crosstalk between zinc and calcium transport in the blood (By similarity). The rank order of affinity is zinc > calcium > magnesium (By similarity). Binds to the bacterial siderophore enterobactin and inhibits enterobactin-mediated iron uptake of E.coli from ferric transferrin, and may thereby limit the utilization of iron and growth of enteric bacteria such as E.coli (PubMed:<a href="http://www.uniprot.org/citations/6234017"

target="_blank">>6234017). Does not prevent iron uptake by the bacterial siderophore aerobactin (PubMed:>6234017).

Cellular Location

Secreted.

Tissue Location

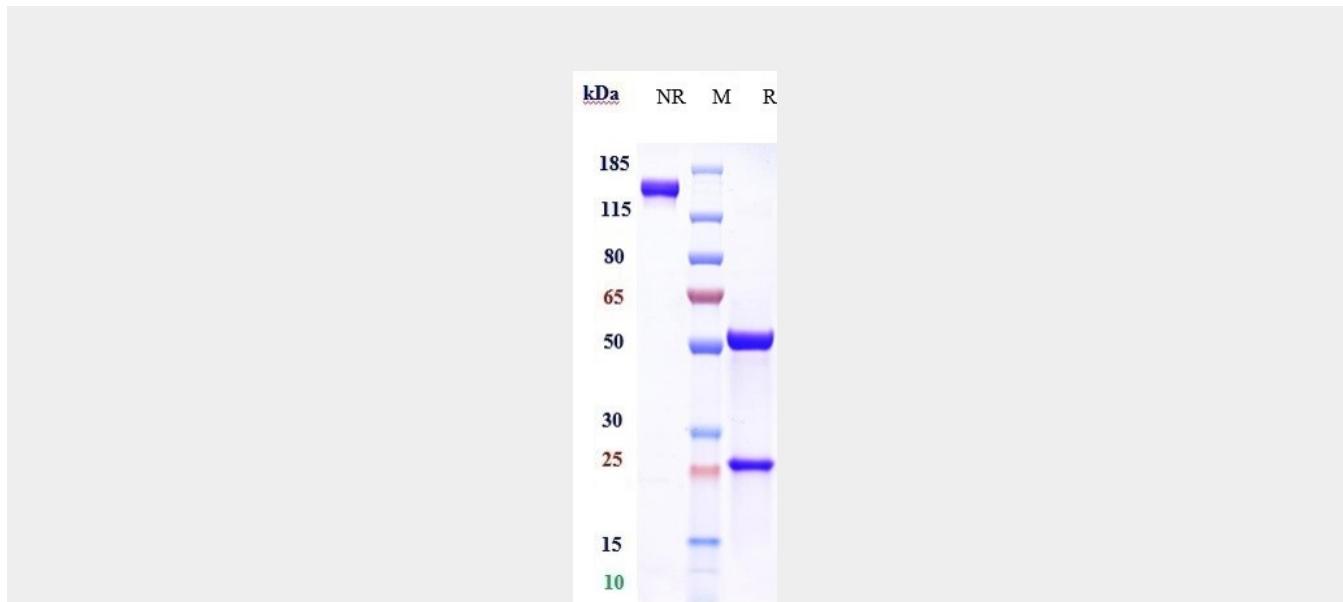

Plasma.

Anti-Albumin Reference Antibody (Numab patent anti-HSA) - Protocols

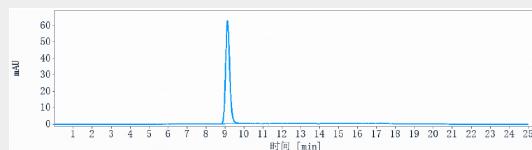

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Anti-Albumin Reference Antibody (Numab patent anti-HSA) - Images

Anti-Albumin Reference Antibody (Numab patent anti-HSA) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-Albumin Reference Antibody (Numab patent anti-HSA) is more than 95%, determined by SEC-HPLC.
