#### Anti-IL-25 Reference Antibody (Centocor patent anti-IL-25) - Protein Information

Name IL25

Synonyms IL17E

#### **Function**

Cytokine produced by various cells such as eosinophils, T- helper type 2 (Th2) cells or epithelial cells that plays a role in internal safety of adaptive immune responses by regulating cytokine production (PubMed:<a href="http://www.uniprot.org/citations/15860795" target="\_blank">15860795</a>, PubMed:<a href="http://www.uniprot.org/citations/25821217" target="\_blank">25821217</a>). Promotes and augments T- helper type 2 responses locally or systemically (PubMed:<a href="http://www.uniprot.org/citations/25821217" target="\_blank">25821217</a>). Exerts its activity via its receptor composed of IL17RA and IL17RB for signal transduction (By similarity). In turn, stimulates the JAK2- STAT5A pathway and promotes the secretion of type-2 associated cytokines including IL4, IL9 and IL13 (PubMed:<a href="http://www.uniprot.org/citations/25821217" target="\_blank">25821217</a>). Also induces

the release of IL8, and IL6 from eosinophils through the combined activation of MAPK and NF-kappa-B pathways (PubMed:<a href="http://www.uniprot.org/citations/15860795" target="\_blank">15860795</a>). Inhibits the differentiation of T-helper (Th17) cells via the production of IL4, IL5 and IL13 (PubMed:<a href="http://www.uniprot.org/citations/11754819" target=" blank">11754819</a>).

**Cellular Location**Secreted.

#### **Tissue Location**

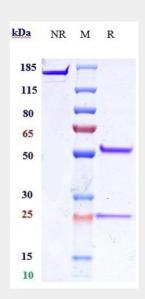

Expressed at low levels in several tissues, including brain, kidney, lung, prostate, testis, spinal cord, adrenal gland, and trachea
