

**Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7)**  
**Recombinant Antibody**  
**Catalog # APR11029****Specification****Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) - Product Information**

Application	FC, Kinetics, Animal Model
Primary Accession	<a href="#">Q15858</a>
Reactivity	Human, Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	150 KDa

**Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) - Additional Information****Target/Specificity**

SCN9a / Nav1.7

**Endotoxin**

&lt; 0.001EU/ µg, determined by LAL method.

**Conjugation**

Unconjugated

**Expression system**

CHO Cell

**Format**

Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

**Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) - Protein Information****Name SCN9A ([HGNC:10597](#))****Synonyms** NENA**Function**

Pore-forming subunit of Nav1.7, a voltage-gated sodium (Nav) channel that directly mediates the depolarizing phase of action potentials in excitable membranes. Navs, also called VGSCs (voltage-gated sodium channels) or VDSCs (voltage-dependent sodium channels), operate by switching between closed and open conformations depending on the voltage difference across the membrane. In the open conformation they allow Na(+) ions to selectively pass through the pore, along their electrochemical gradient. The influx of Na(+) ions provokes membrane depolarization, initiating the propagation of electrical signals throughout cells and tissues (PubMed:<a href="<http://www.uniprot.org/citations/15385606>">15385606</a>, PubMed:<a href="<http://www.uniprot.org/citations/16988069>">16988069</a>, PubMed:<a href="<http://www.uniprot.org/citations/17145499>">17145499</a>, PubMed:<a href="#">[View in PubMed](http://www.ncbi.nlm.nih.gov/pubmed/15385606)

href="http://www.uniprot.org/citations/17167479" target="\_blank">>17167479</a>, PubMed:<a href="http://www.uniprot.org/citations/19369487" target="\_blank">>19369487</a>, PubMed:<a href="http://www.uniprot.org/citations/24311784" target="\_blank">>24311784</a>, PubMed:<a href="http://www.uniprot.org/citations/25240195" target="\_blank">>25240195</a>, PubMed:<a href="http://www.uniprot.org/citations/26680203" target="\_blank">>26680203</a>, PubMed:<a href="http://www.uniprot.org/citations/7720699" target="\_blank">>7720699</a>). Nav1.7 plays a crucial role in controlling the excitability and action potential propagation from nociceptor neurons, thereby contributing to the sensory perception of pain (PubMed:<a href="http://www.uniprot.org/citations/17145499" target="\_blank">>17145499</a>, PubMed:<a href="http://www.uniprot.org/citations/17167479" target="\_blank">>17167479</a>, PubMed:<a href="http://www.uniprot.org/citations/19369487" target="\_blank">>19369487</a>, PubMed:<a href="http://www.uniprot.org/citations/24311784" target="\_blank">>24311784</a>).

### Cellular Location

Cell membrane; Multi-pass membrane protein. Cell projection, neuron projection. Cell projection, axon. Note=Localizes to neuron terminals (PubMed:30765606, PubMed:30795902). Also detected at Nodes of Ranvier (PubMed:30795902).

### Tissue Location

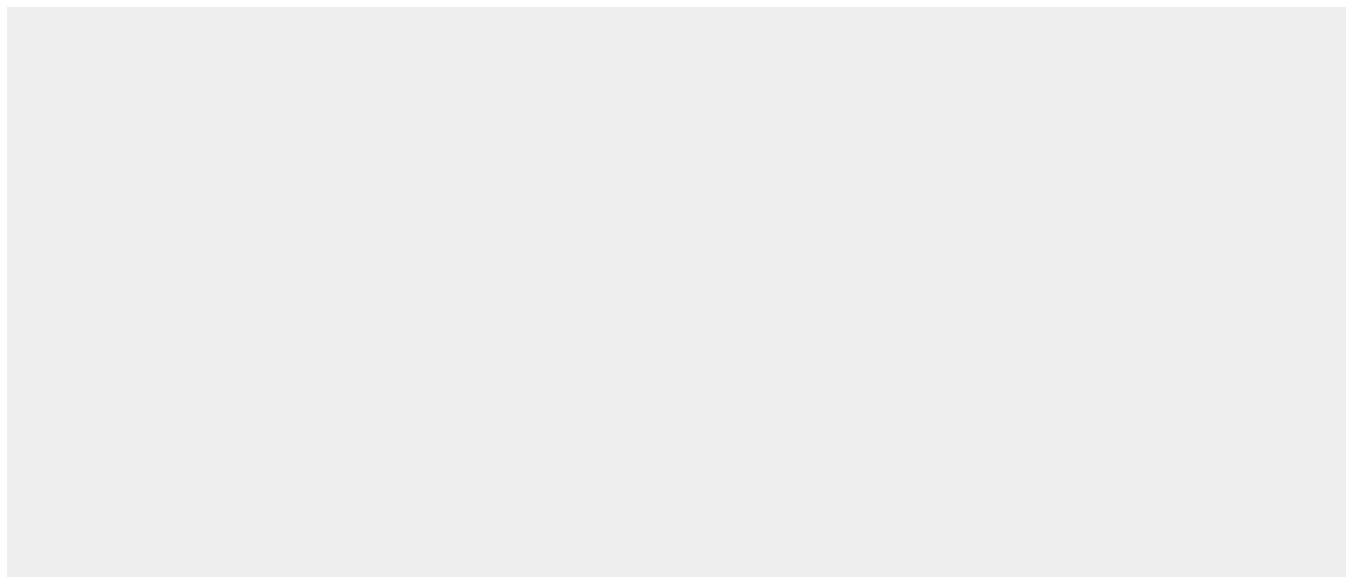

Expressed strongly in dorsal root ganglion, with only minor levels elsewhere in the body, smooth muscle cells, MTC cell line and C-cell carcinoma. Also expressed in vagus nerves within the head and neck region (PubMed:31647222). Isoform 1 is expressed preferentially in the central and peripheral nervous system. Isoform 2 is expressed preferentially in the dorsal root ganglion

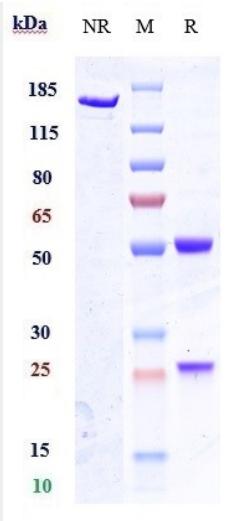

## Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) - Protocols

Provided below are standard protocols that you may find useful for product applications.

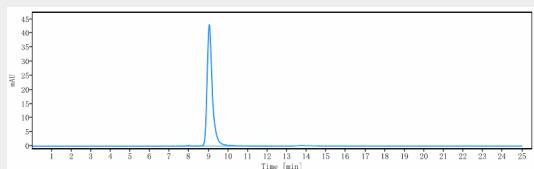

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

## Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) - Images

Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-SCN9a / Nav1.7 Reference Antibody (Duke anti-NAv1.7) is more than 95%, determined by SEC-HPLC.
