

SARS Matrix Antibody
Catalog # ASC10326**Specification****SARS Matrix Antibody - Product Information**

Application	E
Primary Accession	P59596
Other Accession	P59596 , 30173398
Reactivity	Virus
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	SARS matrix antibody can be used for the detection of SARS matrix protein in ELISA. It will detect 10 ng of free peptide at 1 µg/mL.

SARS Matrix Antibody - Additional Information

Gene ID	1489672
Other Names	
SARS Matrix Antibody: Membrane protein, E1 glycoprotein, M protein, Membrane protein	

Target/Specificity

M;

Reconstitution & Storage

SARS Matrix antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

SARS Matrix Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

SARS Matrix Antibody - Protein Information**Name** M {ECO:0000255|HAMAP-Rule:MF_04202}**Function**

Component of the viral envelope that plays a central role in virus morphogenesis and assembly via its interactions with other viral proteins.

Cellular Location

Virion membrane {ECO:0000255|HAMAP- Rule:MF_04202}; Multi-pass membrane protein {ECO:0000255|HAMAP- Rule:MF_04202}. Host Golgi apparatus membrane {ECO:0000255|HAMAP- Rule:MF_04202}; Multi-pass membrane protein {ECO:0000255|HAMAP- Rule:MF_04202}. Note=Largely embedded in the lipid bilayer {ECO:0000255|HAMAP-Rule:MF_04202}

SARS Matrix Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

SARS Matrix Antibody - Background

SARS Matrix Antibody: A novel coronavirus has recently been identified as the causative agent of SARS (Severe Acute Respiratory Syndrome). Coronaviruses are a major cause of upper respiratory diseases in humans. The genomes of these viruses are positive-stranded RNA approximately 27-31kb in length. The M protein (Membrane protein, Matrix protein) is one of the major structural viral proteins. It is an integral membrane protein involved in the budding of the viral particles and interacts with S (Spike) protein and the nucleocapsid protein.
