

KAI1 Antibody
Catalog # ASC10515**Specification**

KAI1 Antibody - Product Information

| | |
|-------------------|---|
| Application | WB, IHC, IF |
| Primary Accession | P27701 |
| Other Accession | NP_002222 , 4504813 |
| Reactivity | Human, Mouse, Rat |
| Host | Rabbit |
| Clonality | Polyclonal |
| Isotype | IgG |
| Application Notes | KAI1 antibody can be used for detection of KAI1 by Western blot at 0.5 - 1 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20 µg/mL. |

KAI1 Antibody - Additional Information

| | |
|--|------|
| Gene ID | 3732 |
| Other Names | |
| KAI1 Antibody: R2, 4F9, C33, IA4, ST6, GR15, KAI1, SAR2, TSPAN27, CD82 antigen, C33 antigen, Tspan-27, CD82 molecule | |

Target/Specificity
CD82;**Reconstitution & Storage**

KAI1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

KAI1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

KAI1 Antibody - Protein Information

Name CD82

Synonyms KAI1, SAR2, ST6, TSPAN27

Function

Associates with CD4 or CD8 and delivers costimulatory signals for the TCR/CD3 pathway.

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location
Lymphoid specific.

KAI1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

KAI1 Antibody - Images

Western blot analysis of KAI1 in A549 cell lysate with KAI1 antibody at (A) 0.5 and (B) 1 μ g/mL.

Immunohistochemistry of KAI1 in human colon tissue with KAI1 antibody at 2.5 μ g/mL.

Immunofluorescence of KAI1 in Human Colon cells with KAI1 antibody at 20 µg/mL.

KAI1 Antibody - Background

KAI1 Antibody: KAI1 was initially identified from a T-cell activation study as a four-transmembrane protein that plays an accessory role in T-cell activation, and was later determined to act as a cancer metastasis suppressor gene. This protein is ubiquitously expressed at moderate to high levels in most tissues, but its expression is downregulated during tumor progression. The loss of KAI1 and p53 is associated with poor survival for prostate and other cancer patients. Recently, KAI1 was found to interact with DARC, the Duffy antigen for chemokines using a yeast two hybrid screen. It is thought that tumor cells dislodged from the primary tumor and expressing KAI1 interact with DARC proteins expressed on vascular cells, transmitting a senescent signal to the tumor cells, while tumor cells that have lost KAI1 expression can proliferate and potentially give rise to metastases. At least two isoforms of KAI1 are known to exist.
