

**RIM2 Antibody**  
**Catalog # ASC10633****Specification**

---

**RIM2 Antibody - Product Information**

Application	IHC
Primary Accession	<a href="#">O9UQ26</a>
Other Accession	<a href="#">NP_001093587</a> , <a href="#">154354983</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	RIM2 antibody can be used for detection of RIM2 by immunohistochemistry at 5 µg/mL.

**RIM2 Antibody - Additional Information**Gene ID **9699****Target/Specificity**

RIMS2; RIM2 antibody is human specific. Multiple isoforms of RIM2 are known to exist.

**Reconstitution & Storage**

RIM2 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

**Precautions**

RIM2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**RIM2 Antibody - Protein Information****Name** RIMS2**Synonyms** KIAA0751, RAB3IP3, RIM2**Function**

Rab effector involved in exocytosis. May act as scaffold protein. Plays a role in dendrite formation by melanocytes (PubMed:<a href="http://www.uniprot.org/citations/23999003" target="\_blank">23999003</a>).

**Cellular Location**

Cell membrane; Peripheral membrane protein. Synapse. Presynaptic cell membrane; Peripheral membrane protein

**Tissue Location**

Widely expressed (PubMed:32470375). Expressed in melanocytes (PubMed:23999003). In fetal tissues, predominantly expressed in the brain (PubMed:32470375). In the retina, expressed in the

outer plexiform layer (at protein level) (PubMed:32470375). In the cerebellum, expressed in Purkinje cells (at protein level) (PubMed:32470375). In the pancreas, expressed in Langerhans islets (at protein level) (PubMed:32470375).

### **RIM2 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### **RIM2 Antibody - Images**

Immunohistochemistry of RIM2 in human brain tissue with RIM2 antibody at 5 µg/ml

### **RIM2 Antibody - Background**

RIM2 Antibody: Rab3-interacting molecules (RIMs) are synaptic proteins necessary for neuronal transmission and plasticity. Rim1 and Rim2 proteins are expressed in overlapping but distinct patterns throughout the brain. While the ablation of either gene was not lethal in mice, the deletion of both resulted in postnatal mortality. This lethality is due to a defect in neurotransmitter release; synapses without RIM proteins can still release neurotransmitters but are unable to do so in response to normal Ca<sup>2+</sup> triggers. Like Rim1, Rim2 is thought to be an effector protein for Rab3, binding to Rab3 on synaptic vesicles in a GTP-dependent manner.
