FAM120A Antibody
Catalog # ASC10961

Specification

FAM120A Antibody - Product Information

Application	**WB, IHC-P, IF, E**
Primary Accession	Q9NZB2
Other Accession	NP_055427, 39652628
Reactivity	**Human, Mouse, Rat**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**IgG**
Application Notes	**FAM120A antibody can be used for detection of FAM120A by Western blot at 0.5 - 1 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20 µg/mL.**

FAM120A Antibody - Additional Information

Gene ID **23196**

Target/Specificity
FAM120A; This antibody will not cross-reacti with FAM120B / PGCC1.

Reconstitution & Storage
FAM120A antibody can be stored at 4℃ for three months and -20℃, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions
FAM120A Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

FAM120A Antibody - Protein Information

Name FAM120A

Function
Component of the oxidative stress-induced survival signaling. May regulate the activation of SRC family protein kinases (PubMed:19015244). May act as a scaffolding protein enabling SRC family protein kinases to phosphorylate and activate PI3-kinase (PubMed:19015244). Binds IGF2 RNA and promotes the production of IGF2 protein (PubMed:19015244).

Cellular Location
Cytoplasm. Cell membrane; Peripheral membrane protein; Cytoplasmic side. Note=Translocates

from the cytosol to plasma membrane after UV irradiation.

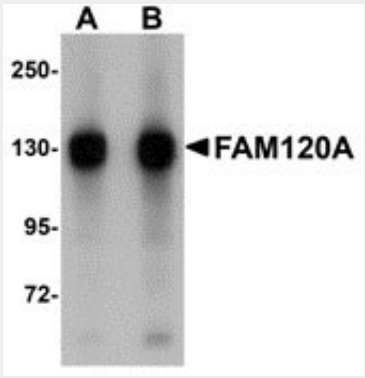
Tissue Location
Widely expressed (PubMed:14585507). In gastric mucosa, detected in the bottom region of the foveolar epithelium (at protein level) (PubMed:19015244).

FAM120A Antibody - Protocols

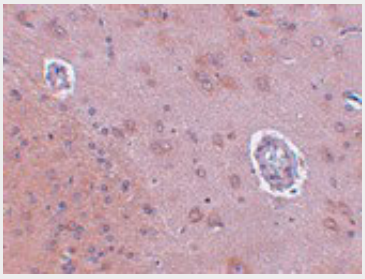
Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

FAM120A Antibody - Images



Western blot analysis of FAM120A in SK-N-SH cell lysate with FAM120A antibody at (A) 0.5 and (B) 1 µg/mL.



Immunohistochemistry of FAM120A in rat brain tissue with FAM120A antibody at 2.5 µg/mL.

Immunofluorescence of FAM120A in Rat Brain cells with FAM120A antibody at 20 µg/mL.

FAM120A Antibody - Background

FAM120A Antibody: FAM120A (C9orf10) is a member of the constitutive coactivator of PPAR gamma family and the gene was mapped to chromosome 9q22.31. FAM120A was recently detected within the Pur-alpha-containing mRNA-protein complex in the brain. As a novel RNA-binding protein, FAM120A is a critical component of the oxidative stress-induced survival signaling. It may participate in mRNA transport in the cytoplasm. FAM120A activates src family kinases and acts as a scaffolding protein enabling src family kinases to phosphorylate and activate PI3-kinase. FAM120A protects cells from apoptosis through activation of SRKs in response to oxidative stress. Blocking of the survival signaling mediated by FAM120A, which sensitizes the cancer cells to stress-induced apoptosis, may be a novel therapeutic approach for gastric scirrhous carcinoma cells.
