Application Notes

**WB, IHC, IF** <u>Q86VH4</u>

NP 001128217, 156139147

Human Rabbit Polyclonal

IqG

LRRTM4 antibody can be used for

detection of LRRTM4 by Western blot at 1 μg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 μg/mL. For immunofluorescence start at 20

μg/mL.

## **LRRTM4 Antibody - Additional Information**

Gene ID **80059** 

# **Target/Specificity**

LRRTM4; At least two isoforms of LRRTM4 are known to exist; this antibody will both isoforms. LRRTM4 antibody is predicted to not cross-react with other LRRTM family members.

#### **Reconstitution & Storage**

LRRTM4 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

#### **Precautions**

LRRTM4 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# **LRRTM4 Antibody - Protein Information**

#### Name LRRTM4

### **Function**

May play a role in the development and maintenance of the vertebrate nervous system. Exhibits strong synaptogenic activity, restricted to excitatory presynaptic differentiation (By similarity).

#### **Cellular Location**

Cell membrane; Single-pass type I membrane protein. Postsynaptic cell membrane; Single-pass type I membrane protein

#### **Tissue Location**

Expressed in neuronal tissues.

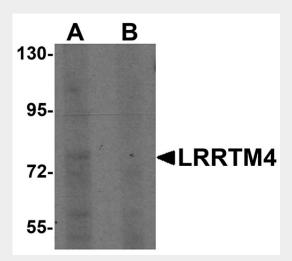

# **LRRTM4 Antibody - Protocols**

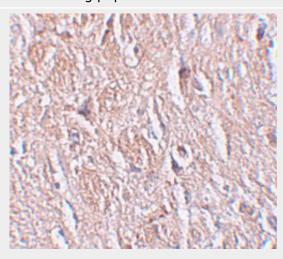

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **LRRTM4 Antibody - Images**

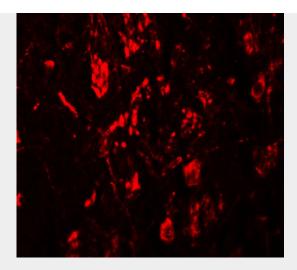

Western blot analysis of LRRTM4 in HeLa cell lysate with LRRTM4 antibody at 1  $\mu$ g/mL in (A) the absence and (B) the presence of blocking peptide.

Immunohistochemistry of LRRTM4 in human brain tissue with LRRTM4 antibody at 2.5 μg/mL.

Immunofluorescence of LRRTM4 in human brain tissue with LRRTM4 antibody at 20 μg/mL.

### LRRTM4 Antibody - Background

LRRTM4 Antibody: The Leucine-rich repeat transmembrane neuronal proteins (LRRTMs) are differentially expressed in the nervous system and were recently found to instruct presynaptic and mediate postsynaptic glutamatergic differentiation, with LRRTM1 and LRRTM2 most potent at inducing presynaptic differentiation. Little is known about the function of LRRTM4; in mouse, it is expressed in the limb mesenchyme, neural tube, caudal mesoderm and in three distinct regions of the head. Later expression occurs in a subset of the developing sclerotome. Its similarity to other LRRTM family members suggests that LRRTM4 may also play a role in the development and maintenance of the vertebrate nervous system.
