

ARHGAP39 Antibody
Catalog # ASC11361**Specification**

ARHGAP39 Antibody - Product Information

Application	WB
Primary Accession	O9C0H5
Other Accession	NP_079527 , 58331179
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	ARHGAP39 antibody can be used for detection of ARHGAP39 by Western blot at 1 - 2 µg/mL.

ARHGAP39 Antibody - Additional InformationGene ID **80728****Target/Specificity**

ARHGAP39; ARHGAP39 antibody is predicted to not cross-react with other RhoGAP protein family members.

Reconstitution & Storage

ARHGAP39 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

ARHGAP39 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ARHGAP39 Antibody - Protein Information**Name** ARHGAP39**Synonyms** KIAA1688**Cellular Location**

Nucleus.

ARHGAP39 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)

- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ARHGAP39 Antibody - Images

Western blot analysis of ARHGAP39 in A20 cell lysate with ARHGAP39 antibody at (A) 1 and (B) 2 μ g/mL

ARHGAP39 Antibody - Background

ARHGAP39 Antibody: Rho GTPases are important regulators of the actin cytoskeleton and consequently influence the shape and migration of cells. GTPase-activating proteins (GAPs) accelerate the intrinsic rate of GTP hydrolysis of Ras-related proteins. ARHGAP39 (Rho GTPase activating protein 39) is a 1,083 amino acid nuclear protein that contains one MyTH4 domain, one Rho GAP domain and two WW domains. It is encoded by a gene located on human chromosome 8, which is associated with a variety of diseases and malignancies. ARHGAP39 regulates robo signaling and plays important roles in axon guidance.
