

PRRX1 Antibody
Catalog # ASC11893**Specification**

PRRX1 Antibody - Product Information

Application	WB, E
Primary Accession	P54821
Other Accession	NP_073207 , 12707577
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	Predicted: 27 kDa
Application Notes	Observed: 26 kDa KDa PRRX1 antibody can be used for detection of PRRX1 by Western blot at 1 - 2 µg/ml.

PRRX1 Antibody - Additional InformationGene ID **5396****Target/Specificity**

PRRX1; PRRX1 antibody is human, mouse and rat reactive. At least two isoforms of PRRX1 are known to exist; this antibody will detect both isoforms.

Reconstitution & Storage

PRRX1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

PRRX1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

PRRX1 Antibody - Protein Information**Name** PRRX1**Synonyms** PMX1**Function**

Master transcription factor of stromal fibroblasts for myofibroblastic lineage progression. Orchestrates the functional drift of fibroblasts into myofibroblastic phenotype via TGF-beta signaling by remodeling a super-enhancer landscape. Through this function, plays an essential role in wound healing process (PubMed:35589735). Acts as a transcriptional regulator of muscle creatine kinase (MCK) and so has a role in the establishment of diverse mesodermal muscle types. The protein binds to an A/T-rich element in the muscle creatine enhancer (By similarity). May play a role in homeostasis and regeneration of bone, white adipose tissue and derm (By similarity).

Cellular Location

Nucleus {ECO:0000250|UniProtKB:P63013}.

Tissue Location

[Isoform 1]: Widely expressed in embryonic and adult tissues, with highest levels in skeletal muscle. Isoform 1 is either expressed at similar or higher levels compared to isoform 2 in all embryonic tissues but skeletal muscle and heart. In adult tissues, expressed at lower levels compared to isoform 2

PRRX1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PRRX1 Antibody - Images

Western blot analysis of PRRX1 in HeLa cell lysate with PRRX1 antibody at 1 µg/ml.

PRRX1 Antibody - Background

The paired related homeobox protein 1 (PRRX1) is a paired-type DNA-binding homeodomain that plays an important role as a key switch for neural cell lineage determination and is essential for development (1,2). PRRX1 is expressed in a number of undifferentiated mesenchymal cells in mouse embryos and adults (3). Mice with a disrupted PRRX1 gene show perinatal death with craniofacial and limb malformations (4). Low PRRX1 expression levels were significantly associated with metastasis and poor prognosis of breast and colorectal cancer (5).
