

# SLC38A4 Antibody

Catalog # ASC11953

### Specification

## SLC38A4 Antibody - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype Calculated MW Application Notes

WB, IHC, E <u>Q969I6</u> <u>NP\_060488</u>, <u>18482385</u> Human, Mouse Rabbit Polyclonal IgG Predicted: 60 kDa; Observed: 60 kDa KDa SLC38A4 antibody can be used for the detection of SLC38A4 by Western blot at 1 - 2 μg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 μg/mL.

### SLC38A4 Antibody - Additional Information

Gene ID

55089

**Target/Specificity** SLC38A4; SLC38A4 antibody is human and mouse reactive. SLC38A4 will not cross-react with other members of the SLC38 protein family.

**Reconstitution & Storage** 

SLC38A4 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

**Precautions** SLC38A4 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### SLC38A4 Antibody - Protein Information

Name SLC38A4 (<u>HGNC:14679</u>)

#### Function

Symporter that cotransports neutral amino acids and sodium ions from the extraccellular to the intracellular side of the cell membrane (PubMed:<a

#### **Cellular Location**

Cell membrane; Multi-pass membrane protein. Cell projection, microvillus membrane; Multi-pass membrane protein Note=Microvillus membrane localization in placenta

#### **Tissue Location**

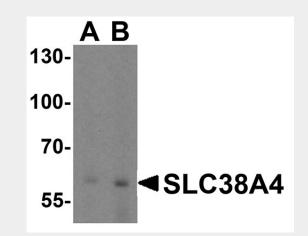

Expressed almost exclusively in embryonic and adult liver, and at lower levels in the kidney (PubMed:11342143, PubMed:11414754). Expressed at lower levels in adult muscle and pancreas (PubMed:11414754). Detected in fetal blood vessels (PubMed:16148032). Expressed in syncytiotrophoblas of placenta during first trimester and at term (PubMed:16148032, PubMed:19015196). Highly expressed in first trimester placenta compared to term placenta (PubMed:19015196).

#### SLC38A4 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

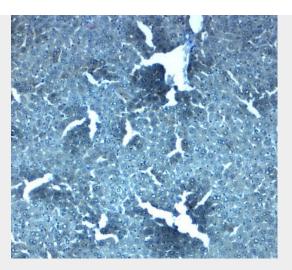

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

#### SLC38A4 Antibody - Images

Western blot analysis of SLC38A4 in mouse kidney tissue lysate with SLC38A4 antibody at (A) 1 and (B) 2  $\mu$ g/ml.

Immunohistochemistry of SLC38A4 in mouse liver tissue with SLC38A4 antibody at 2.5  $\mu$ g/mL.

# SLC38A4 Antibody - Background

SLC38A4 is found predominantly in liver and transports both cationic and neutral amino acids (1,2). The transport of cationic amino acids by SLC38A4 is sodium and pH independent, while the transport of neutral amino acids is sodium and pH dependent (2). Recent evidence suggests that SLC38A4 functions as a regulator of protein synthesis downstream of the hepatocyte nuclear factor 4a during liver development (3). It has also been suggested that SLC38A4 has ATPase activity and is critically involved in the maintenance of mitochondrial homeostasis and cell survival (4).
