

Swine H1N1 Hemagglutinin Antibody [3E9H5]
Catalog # ASC12012**Specification**

Swine H1N1 Hemagglutinin Antibody [3E9H5] - Product Information

Application	E
Primary Accession	C4AL34
Other Accession	ACQ76314 , 229535834
Reactivity	Virus
Host	Mouse
Clonality	Monoclonal
Isotype	IgG2b
Application Notes	This antibody can be used for the detection of the hemagglutinin protein from the H1N1 strain of S-OIV A in ELISA.

Swine H1N1 Hemagglutinin Antibody [3E9H5] - Additional Information**Target/Specificity**

HA;

Reconstitution & Storage

Swine H1N1 Hemagglutinin monoclonal antibody can be stored at -20°C, stable for one year.

Precautions

Swine H1N1 Hemagglutinin Antibody [3E9H5] is for research use only and not for use in diagnostic or therapeutic procedures.

Swine H1N1 Hemagglutinin Antibody [3E9H5] - Protein Information**Swine H1N1 Hemagglutinin Antibody [3E9H5] - Protocols**

Provided below are standard protocols that you may find useful for product applications.

Swine H1N1 Hemagglutinin Antibody [3E9H5] - Images

S-OIV A H1 Antibody specifically recognizes S-OIV H1 peptide, and does not cross-react with peptide corresponding to seasonal influenza A H1 in ELISA.

Swine H1N1 Hemagglutinin Antibody [3E9H5] - Background

Swine H1N1 Hemagglutinin Monoclonal Antibody: Influenza A virus has one of sixteen possible Hemagglutinin (HA) surface proteins and one of nine possible Neuraminidase (NA) surface proteins. In early 2009, a novel H1N1 swine-origin influenza (S-OIV) A virus was identified in specimens obtained from patients in Mexico and the United States. The genetic make-up of this swine flu virus is unlike any other: it is an H1N1 strain that combines a triple assortment first identified in 1998 including human, swine, and avian influenza with two new pig H3N2 virus genes from Eurasia, themselves of recent human origin. This antibody is specific for the novel swine influenza Hemagglutinin and will not recognize the corresponding Hemagglutinin sequence from the seasonal H1N1 influenza (A/Brisbane/59/2007 (H1N1)).
