TMEM41B (NT) Antibody
Infectious Disease, COVID-19
Catalog # ASC12205

Specification

TMEM41B (NT) Antibody - Product Information

Application	**WB, IF, E**
Primary Accession	Q5BJD5
Other Accession	Q5BJD5
Reactivity	**Rat**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**IgG**
Calculated MW	**Predicted: 33kD** **Observed: 33 kD KDa**
Application Notes	**WB: 2 µg/mL; IF: 20 µg/mL.** **Antibody validated: Western Blot in human, mouse, and rat samples; Immunofluorescence in human, mouse and rat samples. All other applications and species not yet tested.**

TMEM41B (NT) Antibody - Additional Information

Gene ID	**440026**
Alias Symbol	**TMEM41B**

Other Names
TMEM41B Antibody: Transmembrane protein 41B, Protein stasimon, TMEM41B, KIAA0033.

Reconstitution & Storage
TMEM41B antibody can be stored at 4˚C for three months and -20˚C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions
TMEM41B (NT) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

TMEM41B (NT) Antibody - Protein Information

Name TMEM41B {ECO:0000303|PubMed:30352685, ECO:0000312|HGNC:HGNC:28948}

Function
Phospholipid scramblase involved in lipid homeostasis and membrane dynamics processes (PubMed:33850023, PubMed:33929485, PubMed:34015269). Has phospholipid scramblase activity toward cholesterol and phosphatidylserine, as well as

phosphatidylethanolamine and phosphatidylcholine (PubMed:33850023, PubMed:33929485, PubMed:34015269). Required for autophagosome formation: participates in early stages of autophagosome biogenesis at the endoplasmic reticulum (ER) membrane by reequilibrating the leaflets of the ER as lipids are extracted by ATG2 (ATG2A or ATG2B) to mediate autophagosome assembly (PubMed:30093494, PubMed:30126924, PubMed:30933966, PubMed:33850023, PubMed:33929485, PubMed:34015269, PubMed:34043740). In addition to autophagy, involved in other processes in which phospholipid scramblase activity is required (PubMed:33850023). Required for normal motor neuron development (By similarity).

Cellular Location
Endoplasmic reticulum membrane; Multi-pass membrane protein. Endomembrane system
Note=Localized to specific membrane structures termed mitochondria- associated membranes (MAMs) which connect the endoplasmic reticulum (ER) and the mitochondria.

TMEM41B (NT) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Figure 1 WB Validation in Human Cell Lines
Loading: 15 µg of lysate Antibodies: TMEM41B 9567, 2 µg/mL , 1 h incubation at RT in 5% NFDM/TBST. Secondary: Goat Anti-Rabbit IgG HRP conjugate at 1:10,000 dilution.

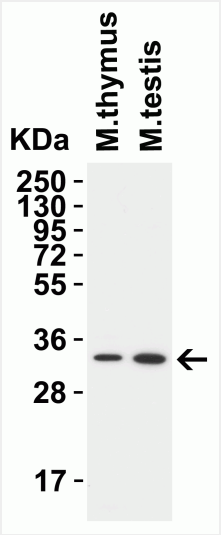

Figure 2 Western Blot Validation in Mouse Tissues
Loading: 15 µg of lysates per lane. Antibodies: TMEM41B 9567, 2 µg/mL, 1h incubation at RT in 5% NFDM/TBST. Secondary: Goat anti-rabbit IgG HRP conjugate at 1:10,000 dilution.

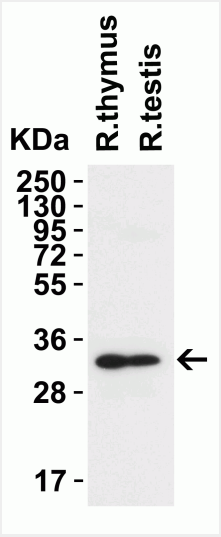

Figure 3 Western Blot Validation in Rat Tissues
Loading: 15 µg of lysates per lane. Antibodies: TMEM41B 9567, 2 µg/mL, 1h incubation at RT in 5% NFDM/TBST. Secondary: Goat anti-rabbit IgG HRP conjugate at 1:10,000 dilution.

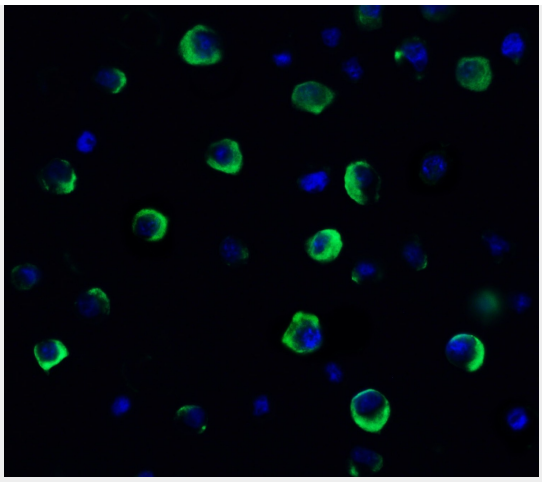

Figure 4 Immunofluorescence Validation of TMEM41B in HeLa Cells
Immunofluorescent analysis of 4% paraformaldehyde-fixed HeLa cells labeling TMEM41B with 9567 at 20 µg/mL, followed by goat anti-rabbit IgG secondary antibody at 1/500 dilution (green) and DAPI staining (blue).

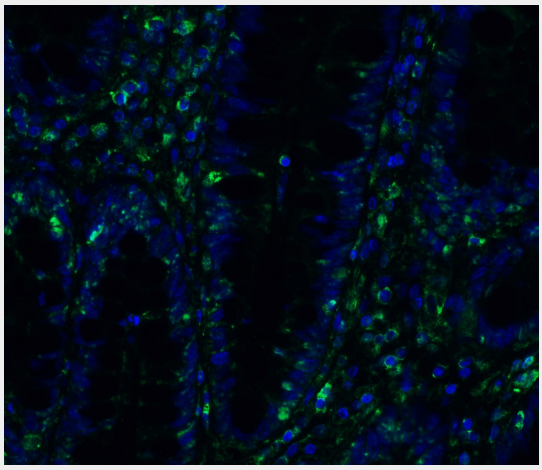

Figure 5 Immunofluorescence Validation of TMEM41B in Human Colon
Immunofluorescent analysis of 4% paraformaldehyde-fixed human colon labeling TMEM41B with 9567 at 20 µg/mL, followed by goat anti-rabbit IgG secondary antibody at 1/500 dilution (green) and DAPI staining (blue).

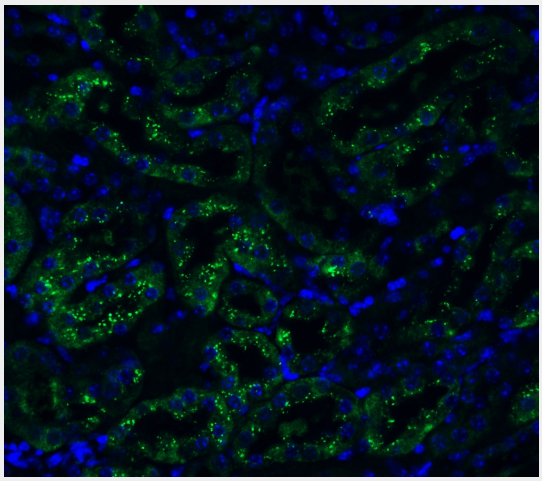

Figure 6 Immunofluorescence Validation of TMEM41B in Mouse Kidney

Immunofluorescent analysis of 4% paraformaldehyde-fixed mouse kidney labeling TMEM41B with 9567 at 20 µg/mL, followed by goat anti-rabbit IgG secondary antibody at 1/500 dilution (green) and DAPI staining (blue).

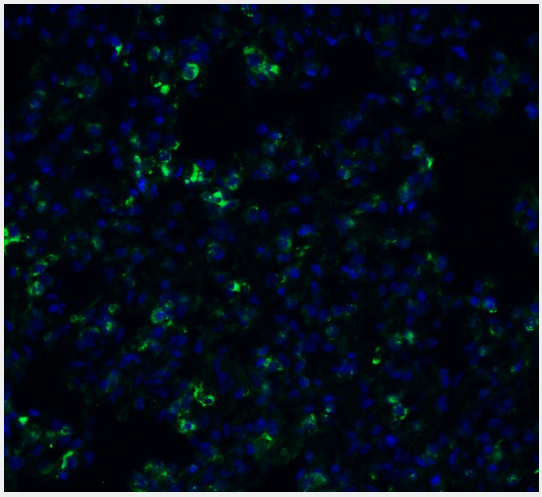

Figure 7 Immunofluorescence Validation of TMEM41B in Rat Lung
Immunofluorescent analysis of 4% paraformaldehyde-fixed rat lung labeling TMEM41B with 9567 at 20 µg/mL, followed by goat anti-rabbit IgG secondary antibody at 1/500 dilution (green) and DAPI staining (blue).

TMEM41B (NT) Antibody - Background

TMEM41B Antibody: TMEM41B is required for autophagosome formation and participates in early stages of autophagosome biogenesis at the ER membrane probably via mobilization of neutral lipids from lipid droplets.
TMRM41B is a critical host factor required for infection by human coronaviruses SARS-CoV-2, HCoV-OC43, HCoV-NL63, and HCoV-229E, as well as all flaviviruses tested such as Zika virus and Yellow fever virus. It is required post-entry of the virus to facilitate the ER membrane remodeling necessary to form replication organelles.
