

TNF-R1 Antibody
Catalog # ASM10426**Specification**

TNF-R1 Antibody - Product Information

| | |
|-------------------|--|
| Application | WB, IHC, IP, ICC |
| Primary Accession | P19438 |
| Other Accession | P19438 |
| Host | Rabbit |
| Reactivity | Human, Mouse, Rat, Rabbit, Monkey, Bovine, Dog |
| Clonality | Polyclonal |
| Format | RPE |

Description

Rabbit Anti-Mouse TNF-R1 Polyclonal

Target/Specificity

Detects ~55kDa.

Other Names

Tumor necrosis factor receptor 1 Antibody, TNFR-1 Antibody, TNFRSF1A Antibody, TNFAR Antibody, TNFR1 Antibody

Immunogen

Peptide corresponding to AA 20-43 of the mouse TNF-R1 sequence, identical to rat and human over those residues

Purification

Peptide Affinity Purified

Storage **-20°C****Storage Buffer**

PBS pH7.4, 50% glycerol, 0.09% sodium azide

Shipping Temperature **Blue Ice or 4°C****Certificate of Analysis**

1 µg/ml of SPC-170 was sufficient for detection of TNFR1 in 20 µg of Hela lysate by colorimetric immunoblot analysis using Goat anti-rabbit IgG:HRP as the secondary antibody.

Cellular Localization

Cell Membrane | Golgi Apparatus | Golgi Apparatus Membrane

TNF-R1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

TNF-R1 Antibody - Background

The Tumor Necrosis Factor Receptor (TNFR) also known as Cluster of differentiation (CD120) is a protein that belongs to the (TNF)/ (TNFR) superfamily. TNF interacts with two distinct receptors TNFR1 and TNFR2. These receptors share no homology on their cytoplasmic sequences(1,3).TNFR1 also known as p55/p60 is a high affinity receptor for TNF- α . The TNFR1 has an extracellular domain with variable numbers of cysteine-rich repeats. The functional properties of TNFR1 are targets in new therapies for osteoporosis, chronic inflammatory and autoimmune diseases (1, 2). The TNF- α /TNFR1 receptor complex is responsible for the recruitment and the subsequent activation of the caspase (aspartate-specific cysteine proteases) that regulate apoptosis.
