

Hamster IgG Fluorescein
Catalog # ASR1075**Specification**

Hamster IgG Fluorescein - Product Information

Description	HAMSTER IgG whole molecule Fluorescein conjugated
Conjugate	Fluorescein (FITC)
FP Value	3.0 moles Fluorescein (FITC) per mole of Golden Syrian Hamster IgG
Physical State	Lyophilized
Host Isotype	IgG
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Species of Origin	Golden Syrian Hamster
Reconstitution Volume	1.0 mL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Preservative	0.01% (w/v) Sodium Azide

Hamster IgG Fluorescein - Additional Information**Shipping Condition**

Ambient

Purity

This product was prepared from normal serum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein, anti-GS Hamster IgG and anti-GS Hamster Serum. Greatly diminished reactivity will occur against anti-Armenian Hamster IgG.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Hamster IgG Fluorescein - Protein Information**Hamster IgG Fluorescein - Protocols**

Provided below are standard protocols that you may find useful for product applications.

Hamster IgG Fluorescein - Background

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
