

Human IgM (myeloma) Rhodamine
Catalog # ASR1194**Specification****Human IgM (myeloma) Rhodamine - Product Information**

Description	HUMAN IgM (myeloma) whole molecule
Conjugate	Rhodamine conjugated
FP Value	Rhodamine (TRITC)
Physical State	7.2 moles Rhodamine (TRITC) per mole of
Host Isotype	Human IgM
Buffer	Lyophilized
Species of Origin	0.1 M Tris Chloride, 0.5 M Sodium
Reconstitution Volume	Chloride, pH 8.0
Reconstitution Buffer	Human
Stabilizer	1.0 mL
Preservative	Restore with deionized water (or equivalent)
	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
	0.01% (w/v) Sodium Azide

Human IgM (myeloma) Rhodamine - Additional Information**Shipping Condition**

Ambient

Purity

This product was prepared from normal serum by delipidation, salt fractionation, ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Human IgM and anti-Human Serum.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Human IgM (myeloma) Rhodamine - Protein Information**Human IgM (myeloma) Rhodamine - Protocols**

Provided below are standard protocols that you may find useful for product applications.

Human IgM (myeloma) Rhodamine - Background

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
