

**Anti-Monkey IgG IgA IgM (H&L) (Rhodamine Conjugated) Secondary Antibody**  
**Goat Polyclonal, Rhodamine (TRITC)**  
**Catalog # ASR2254****Specification****Anti-Monkey IgG IgA IgM (H&L) (Rhodamine Conjugated) Secondary Antibody - Product Information**

|                       |                                                                                          |
|-----------------------|------------------------------------------------------------------------------------------|
| Description           | <b>Anti-MONKEY IgG IgA IgM (H&amp;L) (GOAT) Antibody Rhodamine Conjugated</b>            |
| Host                  | <b>Goat</b>                                                                              |
| Conjugate             | <b>Rhodamine (TRITC)</b>                                                                 |
| FP Value              | <b>3.0 moles Rhodamine (TRITC) per mole of IgG</b>                                       |
| Target Species        | <b>Monkey</b>                                                                            |
| Clonality             | <b>Polyclonal</b>                                                                        |
| Application           | <b>IF, FC</b>                                                                            |
| Application Note      | <b>FLISA 1:10,000-1:50,000;IF Microscopy 1:1,000-1:5,000;FlowCytometry 1:500-1:2,500</b> |
| Physical State        | <b>Lyophilized</b>                                                                       |
| Host Isotype          | <b>IgG</b>                                                                               |
| Target Isotype        | <b>IgG IgA IgM</b>                                                                       |
| Buffer                | <b>0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2</b>                        |
| Immunogen             | <b>Monkey IgG, IgA, IgM whole molecules</b>                                              |
| Reconstitution Volume | <b>1.0 mL</b>                                                                            |
| Reconstitution Buffer | <b>Restore with deionized water (or equivalent)</b>                                      |
| Stabilizer            | <b>10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free</b>            |
| Preservative          | <b>0.01% (w/v) Sodium Azide</b>                                                          |

**Anti-Monkey IgG IgA IgM (H&L) (Rhodamine Conjugated) Secondary Antibody - Additional Information****Shipping Condition**

Ambient

**Purity**

This product was prepared from monospecific antiserum by immunoaffinity chromatography using Monkey antigens coupled to agarose beads. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum. This reagent is suitable for the detection of all Monkey immunoglobulin isotypes and chain combinations.

**Storage Condition**

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

**Precautions Note**

This product is for research use only and is not intended for therapeutic or diagnostic applications.

**Anti-Monkey IgG IgA IgM (H&L) (Rhodamine Conjugated) Secondary Antibody - Protein Information****Anti-Monkey IgG IgA IgM (H&L) (Rhodamine Conjugated) Secondary Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

This table displays additional reactivity among various species of serum and immunoglobulin. A (+) indicates antibody reactivity to the corresponding target.

**Anti-Monkey IgG IgA IgM (H&L) (Rhodamine Conjugated) Secondary Antibody - Background**

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
