#### **Purity**

F(ab')2 Anti-Mouse IgG (H&L) was prepared from monospecific antiserum by immunoaffinity chromatography using Mouse IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase, anti-Rabbit Serum, Mouse IgG and Mouse Serum. No reaction was observed against anti-Pepsin, anti-Rabbit IgG F(c) or Human Serum Proteins.

#### **Storage Condition**

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted

liquid. Dilute only prior to immediate use.

### F(ab')2 Anti-Mouse IgG (Peroxidase Conjugated) Secondary Antibody - Background

F(ab')2 Anti-Mouse IgG antibody reacts with the F(ab')2 heavy chains of IgG and the light chains common to most immunoglobulins from mice. No cross-reactivity has been detected against non-immunoglobulin serum proteins. F(ab')2 Anti-Mouse IgG antibody is ideal for investigators involved in serum component protein research.
