Stabilizer

Purity

This product was prepared from normal serum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by pepsin digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Golden Syrian Hamster IgG, anti-Golden Syrian Hamster IgG and anti-Golden Syrian Hamster Serum. No reaction was observed against anti-Golden Syrian Hamster IgG IgG

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Hamster IgG F(ab')2 (BULK ORDER) - Protein Information

Hamster IgG F(ab')2 (BULK ORDER) - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Western Blot

- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
