

**Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated**  
**Urease Antibody Peroxidase Conjugated**  
**Catalog # ASR4693****Specification****Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated - Product Information**

Host	Rabbit
Conjugate	Peroxidase (Horseradish)
Target Species	Jack Bean
Clonality	Polyclonal
Application	WB, E, IP, I, LCI
Application Note	Anti-Urease peroxidase conjugated antibody has been tested by dot blot and is suitable to be assayed against 1.0 ug of Urease [Jack Bean] in a standard capture ELISA using ABTS (2,2'-azino-bis-[3-ethylbenzothiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:500 to 1:2,000 of the reconstitution concentration is suggested for this product.
Physical State	Lyophilized
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Immunogen	Urease [Jack Bean]
Reconstitution Volume	100 µL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Preservative	0.01% (w/v) Gentamicin Sulfate. Do NOT add Sodium Azide!

**Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated - Additional Information****Purity**

Urease is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase, anti-Rabbit Serum as well as purified and partially purified Urease [Jack Bean]. Cross reactivity against Urease from other tissues and species may occur but have not been specifically determined.

**Storage Condition**

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted

liquid. Dilute only prior to immediate use.

#### **Precautions Note**

This product is for research use only and is not intended for therapeutic or diagnostic applications.

### **Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated - Protein Information**

#### **Name** UREA

#### **Function**

Urea hydrolase involved in nitrogen recycling from ureide, purine, and arginine catabolism (PubMed:<a href="http://www.uniprot.org/citations/26690979" target="\_blank">26690979</a>). Is known to be highly toxic and lethal when given by intravenous route, producing convulsions and other signs of central nervous system intoxication associated with the high levels of ammonia formed in the blood of mice and rabbits (PubMed:<a href="http://www.uniprot.org/citations/26690979" target="\_blank">26690979</a>). Is neurotoxic in mammals, when directly injected into hippocampus (PubMed:<a href="http://www.uniprot.org/citations/33631299" target="\_blank">33631299</a>). It may induce seizures by acting at a neuronal network level, thereby disturbing electroencephalographic rhythms and causing metabolic alterations in key areas related to epileptogenesis and to neurogenic pulmonary edema (PubMed:<a href="http://www.uniprot.org/citations/33631299" target="\_blank">33631299</a>). It increases calcium influx and neuronal firing rate in the hippocampus (PubMed:<a href="http://www.uniprot.org/citations/33631299" target="\_blank">33631299</a>). Is able to insert itself into lipid bilayers, altering physicochemical properties of artificial membranes, and forming cation-selective ion channels (PubMed:<a href="http://www.uniprot.org/citations/24583269" target="\_blank">24583269</a>). In vitro, has the ability to induce platelet aggregation, platelet granules secretion and release of ATP (PubMed:<a href="http://www.uniprot.org/citations/11696010" target="\_blank">11696010</a>). In contrast to canatoxin, another urease from *C. ensiformis*, is not lethal to mice when intraperitoneally injected (PubMed:<a href="http://www.uniprot.org/citations/11696010" target="\_blank">11696010</a>).

### **Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### **Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated - Images**

### **Anti-UREASE (Jack Bean) (RABBIT) Antibody Peroxidase Conjugated - Background**

Urease is an enzyme involved in nitrogen metabolism. It catalyzes the hydrolysis of urea into carbon dioxide and ammonia.
