

Anti-OVALBUMIN (RABBIT) Antibody (BULK ORDER)
OVALBUMIN Antibody
Catalog # ASR5932**Specification****Anti-OVALBUMIN (RABBIT) Antibody (BULK ORDER) - Product Information**

Host	Rabbit
Conjugate	Unconjugated
Target Species	Chicken
Reactivity	Chicken
Clonality	Polyclonal
Application	WB, IHC, E, IP, I, LCI
Application Note	Anti-Ovalbumin Antibody has been tested in ELISA and Western Blot. Although not tested this product could be useful in assays such as IHC and IP. Specific conditions for reactivity and signal detection should be optimized by the end user.
Physical State	Lyophilized
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Immunogen	Ovalbumin [Hen Egg White]
Reconstitution Volume	5.0 mL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Preservative	0.01% (w/v) Sodium Azide

Anti-OVALBUMIN (RABBIT) Antibody (BULK ORDER) - Additional Information**Gene ID** 396058**Other Names**
396058**Purity**

Rabbit Anti-Ovalbumin Antibody is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum as well as purified and partially purified Ovalbumin [Hen Egg White]. Cross reactivity against Ovalbumin from other sources is unknown.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Anti-OVALBUMIN (RABBIT) Antibody (BULK ORDER) - Protein Information

Name SERPINB14

Function

Non-inhibitory serpin. Storage protein of egg white.

Cellular Location

Secreted.

Tissue Location

Major protein of egg white. Expressed in the magnum of the oviduct (at protein level)
(PubMed:25436390)

Anti-OVALBUMIN (RABBIT) Antibody (BULK ORDER) - Protocols

Provided below are standard protocols that you may find useful for product applications.

Anti-OVALBUMIN (RABBIT) Antibody (BULK ORDER) - Background

Anti-Ovalbumin Antibody recognizes ovalbumin that is the main protein found in egg white. Ovalbumin makes up 55-65% of the total protein. Ovalbumin displays sequence and three-dimensional homology to the serpin superfamily, but unlike most serpins, it does not undergo a conformational change upon proteolytic cleavage and is not a serine protease inhibitor. The function of ovalbumin is still unknown, although it is presumed to be a storage protein for tissue-specific, steroid hormone-induced gene expression. Ovalbumin is a key protein for biochemical investigations and processes and can be used as a control, blocking reagent, or antibody in assays such as ELISA, SDS-PAGE, IHC, Western Blot, and size exclusion chromatography.
