

ALF Antibody (monoclonal) (M05)**Mouse monoclonal antibody raised against a partial recombinant ALF.****Catalog # AT1119a****Specification**

ALF Antibody (monoclonal) (M05) - Product Information

Application	WB, IF
Primary Accession	O9UNN4
Other Accession	NM_006872
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2b Kappa
Calculated MW	52444

ALF Antibody (monoclonal) (M05) - Additional Information**Gene ID** 11036**Other Names**

TFIIA-alpha and beta-like factor, General transcription factor II A, 1-like factor, GTF2A1L, ALF, GTF2A1LF

Target/Specificity

ALF (NP_006863, 251 a.a. ~ 348 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

IF~~1:50~200

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

ALF Antibody (monoclonal) (M05) is for research use only and not for use in diagnostic or therapeutic procedures.

ALF Antibody (monoclonal) (M05) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)

- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ALF Antibody (monoclonal) (M05) - Images

Immunofluorescence of monoclonal antibody to GTF2A1L on HeLa cell . [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.52 KDa) .

Western Blot analysis of ALF expression in transfected 293T cell line by ALF monoclonal antibody (M05), clone 3E4.

Lane 1: ALF transfected lysate(52.4 KDa).

Lane 2: Non-transfected lysate.

ALF Antibody (monoclonal) (M05) - Background

The assembly and stability of the RNA polymerase II transcription pre-initiation complex on a eukaryotic core promoter involve the effects of TFIIA on the interaction between TATA-binding protein (TBP) and DNA. This gene encodes a germ cell-specific counterpart of the large (alpha/beta) subunit of general transcription factor TFIIA that is able to stabilize the binding of TBP to DNA and may be uniquely important to testis biology. Alternative splicing for this locus has been observed and two variants, encoding distinct isoforms, have been identified. Co-transcription of this gene and the neighboring upstream gene generates a rare transcript (SALF), which encodes a fusion protein comprised of sequence sharing identity with each individual gene product.
