

ARX Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a partial recombinant ARX.****Catalog # AT1205a****Specification****ARX Antibody (monoclonal) (M01) - Product Information**

Application	E
Primary Accession	Q96QS3
Other Accession	NM_139058
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	58160

ARX Antibody (monoclonal) (M01) - Additional Information**Gene ID** 170302**Other Names**

Homeobox protein ARX, Aristaless-related homeobox, ARX

Target/Specificity

ARX (NP_620689, 1 a.a. ~ 95 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

E~~N/A

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

ARX Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

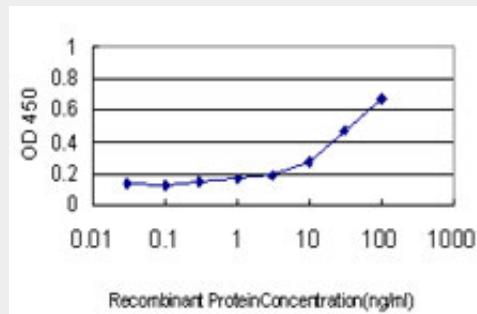

ARX Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ARX Antibody (monoclonal) (M01) - Images

Detection limit for recombinant GST tagged ARX is approximately 0.3ng/ml as a capture antibody.

ARX Antibody (monoclonal) (M01) - Background

This gene is a homeobox-containing gene expressed during development. The expressed protein contains two conserved domains, a C-peptide (or aristaless domain) and the prd-like class homeobox domain. It is a member of the group-II aristaless-related protein family whose members are expressed primarily in the central and/or peripheral nervous system. This gene is thought to be involved in CNS development. Mutations in this gene cause X-linked mental retardation and epilepsy.
