

### CHD3 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant CHD3. Catalog # AT1513a

# **Specification**

# CHD3 Antibody (monoclonal) (M01) - Product Information

Application WB, IHC
Primary Accession Q12873
Other Accession NM\_001005273
Reactivity Human
Host mouse
Clonality Monoclonal
Isotype IgG2a Kappa

Calculated MW 226592

## CHD3 Antibody (monoclonal) (M01) - Additional Information

#### **Gene ID 1107**

#### **Other Names**

Chromodomain-helicase-DNA-binding protein 3, CHD-3, ATP-dependent helicase CHD3, Mi-2 autoantigen 240 kDa protein, Mi2-alpha, Zinc finger helicase, hZFH, CHD3

## Target/Specificity

CHD3 (NP\_001005273, 1654 a.a.  $\sim$  1741 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

## **Dilution**

WB~~1:500~1000

### **Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2.

#### Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

#### **Precautions**

CHD3 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

#### CHD3 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot

- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# CHD3 Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (35.42 KDa).

Immunoperoxidase of monoclonal antibody to CHD3 on formalin-fixed paraffin-embedded human colon. [antibody concentration 3 ug/ml]

## CHD3 Antibody (monoclonal) (M01) - Background

This gene encodes a member of the CHD family of proteins which are characterized by the presence of chromo (chromatin organization modifier) domains and SNF2-related helicase/ATPase domains. This protein is one of the components of a histone deacetylase complex referred to as the Mi-2/NuRD complex which participates in the remodeling of chromatin by deacetylating histones. Chromatin remodeling is essential for many processes including transcription. Autoantibodies against this protein are found in a subset of patients with dermatomyositis. Three alternatively spliced transcripts encoding different isoforms have been described.

# CHD3 Antibody (monoclonal) (M01) - References

LSD1 is a subunit of the NuRD complex and targets the metastasis programs in breast cancer. Wang Y, et al. Cell, 2009 Aug 21. PMID 19703393.UV radiation regulates Mi-2 through protein translation and stability. Burd CJ, et al. J Biol Chem, 2008 Dec 12. PMID 18922793.Differential
