

COL6A2 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant COL6A2.

Catalog # AT1585a

Specification

COL6A2 Antibody (monoclonal) (M01) - Product Information

Application	WB
Primary Accession	P12110
Other Accession	BC002484
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a kappa
Calculated MW	108579

COL6A2 Antibody (monoclonal) (M01) - Additional Information

Gene ID 1292

Other Names

Collagen alpha-2(VI) chain, COL6A2

Target/Specificity

COL6A2 (AAH02484, 1 a.a. ~ 425 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

COL6A2 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

COL6A2 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

COL6A2 Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (72.49 kDa) .

Western Blot analysis of COL6A2 expression in transfected 293T cell line by COL6A2 monoclonal antibody (M01), clone 2C5-F2.

Lane 1: COL6A2 transfected lysate (109 kDa).
Lane 2: Non-transfected lysate.

COL6A2 Antibody (monoclonal) (M01) - Background

This gene encodes one of the three alpha chains of type VI collagen, a beaded filament collagen found in most connective tissues. The product of this gene contains several domains similar to von Willebrand Factor type A domains. These domains have been shown to bind extracellular matrix proteins, an interaction that explains the importance of this collagen in organizing matrix components. Mutations in this gene are associated with Bethlem myopathy and Ullrich scleroatonic muscular dystrophy. Three transcript variants have been identified for this gene.
