

CTNNB1 Antibody (monoclonal) (M02)**Mouse monoclonal antibody raised against a partial recombinant CTNNB1.****Catalog # AT1674a****Specification**

CTNNB1 Antibody (monoclonal) (M02) - Product Information

Application	WB, IF, E
Primary Accession	P35222
Other Accession	NM_001904
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	85497

CTNNB1 Antibody (monoclonal) (M02) - Additional Information**Gene ID** 1499**Other Names**

Catenin beta-1, Beta-catenin, CTNNB1, CTNNB

Target/Specificity

CTNNB1 (AAH58926, 682 a.a. ~ 781 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

IF~~1:50~200

E~~N/A

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

CTNNB1 Antibody (monoclonal) (M02) is for research use only and not for use in diagnostic or therapeutic procedures.

CTNNB1 Antibody (monoclonal) (M02) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)

- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

CTNNB1 Antibody (monoclonal) (M02) - Images

Immunofluorescence of monoclonal antibody to CTNNB1 on HeLa cell. [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.74 KDa) .

Western Blot analysis of CTNNB1 expression in transfected 293T cell line by CTNNB1 monoclonal antibody (M02), clone 1C9.

Lane 1: CTNNB1 transfected lysate(85.5 KDa).

Lane 2: Non-transfected lysate.

Western blot analysis of CTNNB1 over-expressed 293 cell line, cotransfected with CTNNB1 Validated Chimera RNAi (Cat # AT1674a)

Detection limit for recombinant GST tagged CTNNB1 is 0.1 ng/ml as a capture antibody.

Proximity Ligation Analysis of protein-protein interactions between GSK3B and CTNNB1. HeLa cells were stained with anti-GSK3B rabbit purified polyclonal 1:1200 and anti-CTNNB1 mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

Proximity Ligation Analysis of protein-protein interactions between FLT1 and CTNNB1. Huh7 cells were stained with anti-FLT1 rabbit purified polyclonal 1:1200 and anti-CTNNB1 mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

CTNNB1 Antibody (monoclonal) (M02) - Background

The protein encoded by this gene is part of a complex of proteins that constitute adherens junctions (AJs). AJs are necessary for the creation and maintenance of epithelial cell layers by regulating cell growth and adhesion between cells. The encoded protein also anchors the actin cytoskeleton and may be responsible for transmitting the contact inhibition signal that causes cells to stop dividing once the epithelial sheet is complete. Finally, this protein binds to the product of the APC gene, which is mutated in adenomatous polyposis of the colon. Mutations in this gene are a cause of colorectal cancer (CRC), pilomatixoma (PTR), medulloblastoma (MDB), and ovarian cancer. Three transcript variants encoding the same protein have been found for this gene.
