

DHX8 Antibody (monoclonal) (M07)

Mouse monoclonal antibody raised against a partial recombinant DHX8. Catalog # AT1761a

Specification

DHX8 Antibody (monoclonal) (M07) - Product Information

Application WB, E **Primary Accession** 014562 Other Accession NM 004941 Reactivity Human Host mouse Clonality Monoclonal Isotype IgG1 Kappa Calculated MW 139315

DHX8 Antibody (monoclonal) (M07) - Additional Information

Gene ID 1659

Other Names

ATP-dependent RNA helicase DHX8, DEAH box protein 8, RNA helicase HRH1, DHX8, DDX8

Target/Specificity

DHX8 (NP_004932, 301 a.a. \sim 400 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

E~~N/A

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

DHX8 Antibody (monoclonal) (M07) is for research use only and not for use in diagnostic or therapeutic procedures.

DHX8 Antibody (monoclonal) (M07) - Protocols

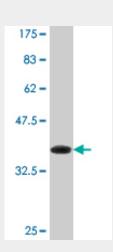

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot

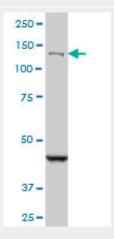

- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

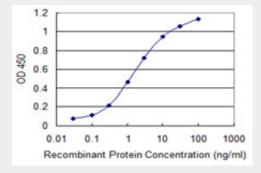

DHX8 Antibody (monoclonal) (M07) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.74 KDa).

DHX8 monoclonal antibody (M07), clone 1D6. Western Blot analysis of DHX8 expression in Jurkat ((Cat # AT1761a)

Detection limit for recombinant GST tagged DHX8 is 0.03 ng/ml as a capture antibody.

DHX8 Antibody (monoclonal) (M07) - Background

DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA

RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. This gene encodes a DEAD box protein, which is highly homologous to yeast Prp22. This protein facilitates nuclear export of spliced mRNA by releasing the RNA from the spliceosome.
