

GPS2 Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a partial recombinant GPS2.****Catalog # AT2253a****Specification**

GPS2 Antibody (monoclonal) (M01) - Product Information

Application	WB, E
Primary Accession	Q13227
Other Accession	BC013652
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	36689

GPS2 Antibody (monoclonal) (M01) - Additional Information**Gene ID** 2874**Other Names**

G protein pathway suppressor 2, GPS-2, GPS2

Target/Specificity

GPS2 (AAH13652, 228 a.a. ~ 327 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

E~~N/A

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

GPS2 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

GPS2 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GPS2 Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.63 kDa) .

Western Blot analysis of GPS2 expression in transfected 293T cell line by GPS2 monoclonal antibody (M01), clone 3C4.

Lane 1: GPS2 transfected lysate (Predicted MW: 36.7 kDa).

Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged GPS2 is approximately 0.3ng/ml as a capture antibody.

GPS2 Antibody (monoclonal) (M01) - Background

This gene encodes a protein involved in G protein-mitogen-activated protein kinase (MAPK) signaling cascades. When overexpressed in mammalian cells, this gene could potentially suppress a RAS- and MAPK-mediated signal and interfere with JNK activity, suggesting that the function of this gene may be signal repression. The encoded protein is an integral subunit of the NCOR1-HDAC3 (nuclear receptor corepressor 1-histone deacetylase 3) complex, and it was shown that the complex inhibits JNK activation through this subunit and thus could potentially provide an alternative mechanism for hormone-mediated antagonism of AP1 (activator protein 1) function.
