

RHOH Antibody (monoclonal) (M03)**Mouse monoclonal antibody raised against a full length recombinant RHOH.****Catalog # AT3638a****Specification**

RHOH Antibody (monoclonal) (M03) - Product Information

Application	E
Primary Accession	Q15669
Other Accession	BC014261
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	21331

RHOH Antibody (monoclonal) (M03) - Additional Information**Gene ID** 399**Other Names**

Rho-related GTP-binding protein RhoH, GTP-binding protein TTF, Translocation three four protein, RHOH, ARHH, TTF

Target/Specificity

RHOH (AAH14261.1, 1 a.a. ~ 191 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

E~~N/A

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

RHOH Antibody (monoclonal) (M03) is for research use only and not for use in diagnostic or therapeutic procedures.

RHOH Antibody (monoclonal) (M03) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

RHOH Antibody (monoclonal) (M03) - Images

Detection limit for recombinant GST tagged RHOH is approximately 1ng/ml as a capture antibody.

RHOH Antibody (monoclonal) (M03) - Background

The protein encoded by this gene is a member of the Ras superfamily of small GTPases. Expression of a chimeric transcript of LAZ3 and this gene has been reported as a result of the translocation t(3;4) in non-Hodgkin's lymphomas. This gene encodes a small G-like protein, and unlike most other small G proteins which are expressed ubiquitously, this gene is transcribed only in hemopoietic cells.
