

#### TRIM5 Antibody (monoclonal) (M06)

Mouse monoclonal antibody raised against a partial recombinant TRIM5. Catalog # AT4358a

#### **Specification**

# TRIM5 Antibody (monoclonal) (M06) - Product Information

Application E
Primary Accession O9C035
Other Accession NM\_033034
Reactivity Human
Host mouse
Clonality Monoclonal
Isotype IgG2a Kappa

Calculated MW 56338

#### TRIM5 Antibody (monoclonal) (M06) - Additional Information

#### **Gene ID 85363**

#### **Other Names**

Tripartite motif-containing protein 5, 632-, RING finger protein 88, TRIM5, RNF88

#### Target/Specificity

TRIM5 (NP\_149023, 309 a.a.  $\sim$  418 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

#### **Dilution**

E~~N/A

### **Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2.

# Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

#### **Precautions**

TRIM5 Antibody (monoclonal) (M06) is for research use only and not for use in diagnostic or therapeutic procedures.

## TRIM5 Antibody (monoclonal) (M06) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry

• Immunofluorescence

- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# TRIM5 Antibody (monoclonal) (M06) - Background

The protein encoded by this gene is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. The protein forms homo-oligomers via the coilel-coil region and localizes to cytoplasmic bodies. It appears to function as a E3 ubiquitin-ligase and ubiqutinates itself to regulate its subcellular localization. It may play a role in retroviral restriction. Multiple alternatively spliced transcript variants encoding different isoforms have been described for this gene.
