

FITC Anti-Mouse F4/80 Antigen (BM8.1) Antibody

Catalog # ATB10125

Specification

FITC Anti-Mouse F4/80 Antigen (BM8.1) Antibody - Product Information

Application Isotype Concentration Reactivity Formulation

Host

FC Rat IgG2a, ĸ 0.5 mg/mL Mouse 10 mM NaH2PO4, 150 mM NaCl, 0.09% NaN3, 0.1% gelatin, pH7.2 Rat

FITC Anti-Mouse F4/80 Antigen (BM8.1) Antibody - Additional Information

Gene ID Gene Name Alternative Name(s) EMR1, Ly71 13733 Emr1

Format FITC

Preparation

This monoclonal antibody was purified from tissue culture supernatant via affinity chromatography. The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation. It is recommended to store the product undiluted at 4°C, and protected from prolonged exposure to light. Do not freeze.

Application Notes

This antibody preparation has been quality-tested for flow cytometry using mouse spleen cells, or an appropriate cell type (where indicated). The amount of antibody required for optimal staining of a cell sample should be determined empirically in your system.

Storage Conditions 2-8°C protected from light

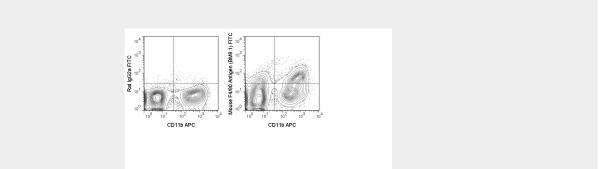

FITC Anti-Mouse F4/80 Antigen (BM8.1) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety

• <u>Cell Culture</u> FITC Anti-Mouse F4/80 Antigen (BM8.1) Antibody - Images

C57BI/6 bone marrow cells were stained with APC Anti-Mouse CD11b (20-0112) and 0.25 ug FITC Anti-Mouse F4/80 Antigen (ATB10125) (right panel) or 0.25 ug FITC Rat IgG2a isotype control (left panel).

FITC Anti-Mouse F4/80 Antigen (BM8.1) Antibody - Background

The BM8.1 antibody is specific for mouse F4/80 antigen, a 125 kDa transmembrane protein widely expressed by members of the mononuclear phagocyte system and considered to be a key marker for mature macrophage cells. F4/80 is differentially expressed during myeloid cell development, and may be regulated by certain cytokines within the tissue microenvironment. Other cell types shown to express this antigen include Langerhans cells, Kupffer cells and dendritic cell subsets. BM8.1 is widely used together with antibodies to CD115 (c-fms), CD11b and CD11c to identify myeloid / macrophage cells by flow cytometry.
