

**redFluor™ 710 Anti-Human/Mouse CD11b (M1/70) Antibody**  
Catalog # ATB10392

**Specification**

---

**redFluor™ 710 Anti-Human/Mouse CD11b (M1/70) Antibody - Product Information**

Application	FC
Isotype	Rat IgG2b, kappa
Concentration	0.2 mg/mL
Reactivity	Human, Mouse
Formulation	10 mM NaH <sub>2</sub> PO <sub>4</sub> , 150 mM NaCl, 0.09% NaN <sub>3</sub> , 0.1% gelatin, pH7.2
Host	Rat

**redFluor™ 710 Anti-Human/Mouse CD11b (M1/70) Antibody - Additional Information**

Gene ID	3684
Gene Name	ITGAM
<b>Format</b>	
redFluor™ 710	

**Storage Conditions**

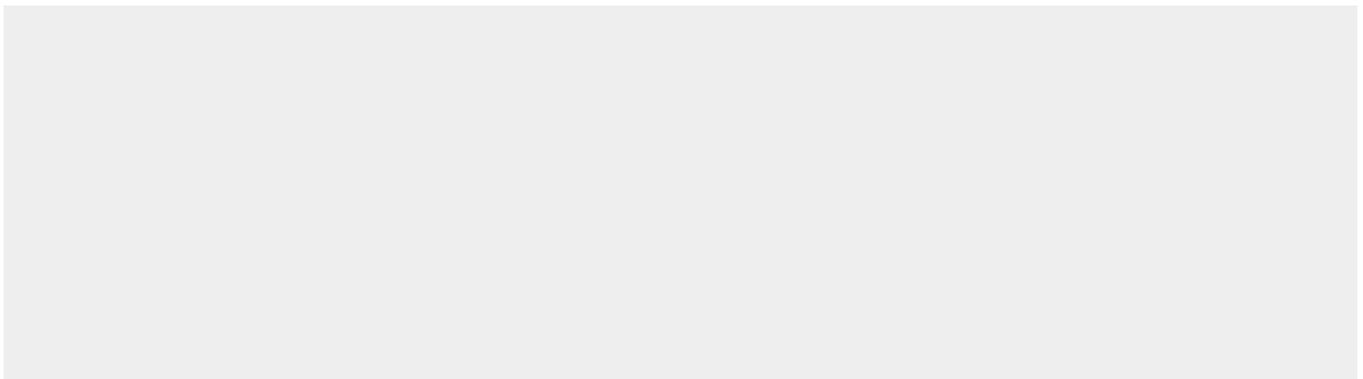

2-8°C protected from light

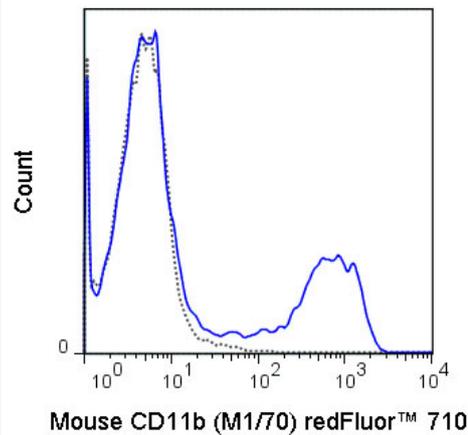

**redFluor™ 710 Anti-Human/Mouse CD11b (M1/70) Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**redFluor™ 710 Anti-Human/Mouse CD11b (M1/70) Antibody - Images**

C57Bl/6 bone marrow cells were stained with 0.25 ug redFluor 710 Anti-Hu/Mo CD11b (ATB10392) (solid line) or 0.25 ug redFluor 710 Rat IgG2b isotype control (dashed line).

### **redFluor™ 710 Anti-Human/Mouse CD11b (M1/70) Antibody - Background**

The M1/70 antibody reacts with human and mouse CD11b, also known as integrin alpha M. This 165-170 kDa cell surface glycoprotein is part of a family of integrin receptors that mediate adhesion between cells (cell-cell) and components of the extracellular matrix, e.g. fibrinogen (cell-matrix). In addition, integrins are active signaling receptors which recruit leukocytes to inflammatory sites and promote cell activation. Complete, functional integrin receptors consist of distinct combinations of integrin chains which are differentially expressed. Integrin alpha M (CD11b) assembles with Integrin beta-2 (CD18) into a receptor known as Macrophage Antigen-1 (Mac-1) or complement receptor type 3 (CR3). This receptor binds and induces intracellular signaling through ICAM-1 on endothelial cells and can also facilitate removal of iC3b bearing foreign cells.

The M1/70 antibody is widely used as a marker for CD11b expression on mouse macrophages, granulocytes, neutrophils, and NK cells. The antibody is also reported to be cross-reactive for Rhesus macaque CD11b.
