

**MGMT Antibody**  
**Purified Mouse Monoclonal Antibody (Mab)**  
**Catalog # AW5643****Specification**

---

**MGMT Antibody - Product Information**

Application	FC, WB,E
Primary Accession	<a href="#">P16455</a>
Other Accession	<a href="#">B4DEE8</a>
Reactivity	Human
Predicted	Monkey
Host	Mouse
Clonality	Monoclonal
Calculated MW	H=22;R=22;M=22 KDa
Isotype	IgG1,k
Antigen Source	HUMAN

**MGMT Antibody - Additional Information****Gene ID** 4255**Antigen Region**  
1-207**Other Names**

Methylated-DNA--protein-cysteine methyltransferase, 6-O-methylguanine-DNA methyltransferase, MGMT, O-6-methylguanine-DNA-alkyltransferase, MGMT

**Dilution**

FC~~1:25

WB~~1:2000

**Target/Specificity**

This MGMT antibody is generated from a mouse immunized with a recombinant protein.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

MGMT Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**MGMT Antibody - Protein Information****Name** MGMT**Function**

Involved in the cellular defense against the biological effects of O6-methylguanine (O6-MeG) and

O4-methylthymine (O4-MeT) in DNA. Repairs the methylated nucleobase in DNA by stoichiometrically transferring the methyl group to a cysteine residue in the enzyme. This is a suicide reaction: the enzyme is irreversibly inactivated.

#### Cellular Location

Nucleus.

#### MGMT Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

#### MGMT Antibody - Images

All lanes : Anti-MGMT Antibody at 1:2000 dilution Lane 1: Jurkat whole cell lysate Lane 2: Molt-4 whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-mouse IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 22 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

Overlay histogram showing Jurkat cells stained with AW5643 (green line). The cells were fixed with 2% paraformaldehyde (10 min) and then permeabilized with 90% methanol for 10 min. The cells were then incubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody (AW5643, 1:25 dilution) for 60 min at 37°C. The secondary antibody used was Goat-Anti-mouse IgG, DyLight® 488 Conjugated Highly Cross-Adsorbed(NA168821)) at 1/400 dilution for 40 min at 37°C. Isotype control antibody (blue line) was mouse IgG (1µg/1x10<sup>6</sup> cells) used under the same conditions. Acquisition of >10, 000 events was performed.

### MGMT Antibody - Background

Involved in the cellular defense against the biological effects of O6-methylguanine (O6-MeG) in DNA. Repairs alkylated guanine in DNA by stoichiometrically transferring the alkyl group at the O-6 position to a cysteine residue in the enzyme. This is a suicide reaction: the enzyme is irreversibly inactivated.
