DANRE gnb1 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

DANRE gnb1 Antibody (N-term) - Protein Information

Name gnb1

Function Guanine nucleotide-binding proteins (G proteins) are involved as a modulator or transducer in various transmembrane signaling systems. The beta and gamma chains are required for the GTPase activity, for replacement of GDP by GTP, and for G protein-effector interaction (By similarity).
