

**HA Tag Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP1012a****Specification**

---

**HA Tag Blocking Peptide - Product Information****HA Tag Blocking Peptide - Additional Information****Other Names**

Glutathione S-transferase

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**HA Tag Blocking Peptide - Protein Information****HA Tag Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**HA Tag Blocking Peptide - Images****HA Tag Blocking Peptide - Background**

Epitope tags consisting of short sequences recognized by well-characterized antibodies have been widely used in the study of protein expression in various systems. The HA tag (YPYDVPDYAYPYDVPDYA) is an established example. Abgent's anti-HA polyclonal antibody provides a simple solution to detect the expression of an HA-tagged protein in cells.
