

VSV-g Tag Blocking Peptide
Synthetic peptide
Catalog # BP1016a**Specification**

VSV-g Tag Blocking Peptide - Product Information**VSV-g Tag Blocking Peptide - Additional Information****Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

VSV-g Tag Blocking Peptide - Protein Information**VSV-g Tag Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

VSV-g Tag Blocking Peptide - Images**VSV-g Tag Blocking Peptide - Background**

Epitope tags consisting of short sequences recognized by well-characterized antibodies have been widely used in the study of protein expression in various systems. VSV-g is an epitope tag composed of an 11 residue peptide, YTDIEMNRLGK, derived from the Vesicular Stomatitis viral glycoprotein. Abgent's anti-VSV-g polyclonal antibody provides a simple solution to detect the expression of a VSV-g-tagged protein in cells.
