

### SEL1L Antibody (Center) Blocking peptide

Synthetic peptide Catalog # BP10685c

### **Specification**

### SEL1L Antibody (Center) Blocking peptide - Product Information

**Primary Accession** 

Q9UBV2

## SEL1L Antibody (Center) Blocking peptide - Additional Information

**Gene ID 6400** 

#### **Other Names**

Protein sel-1 homolog 1, Suppressor of lin-12-like protein 1, Sel-1L, SEL1L, TSA305

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

## **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### SEL1L Antibody (Center) Blocking peptide - Protein Information

Name SEL1L

**Synonyms** TSA305

#### **Function**

Plays a role in the endoplasmic reticulum quality control (ERQC) system also called ER-associated degradation (ERAD) involved in ubiquitin-dependent degradation of misfolded endoplasmic reticulum proteins (PubMed:<a href="http://www.uniprot.org/citations/16186509" target="\_blank">16186509</a>, PubMed:<a href="http://www.uniprot.org/citations/29997207" target="\_blank">29997207</a>). Enhances SYVN1 stability. Plays a role in LPL maturation and secretion. Required for normal differentiation of the pancreas epithelium, and for normal exocrine function and survival of pancreatic cells. May play a role in Notch signaling.

#### **Cellular Location**

Endoplasmic reticulum membrane; Single-pass type I membrane protein

#### **Tissue Location**

Highly expressed in pancreas.

### SEL1L Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### • Blocking Peptides

## SEL1L Antibody (Center) Blocking peptide - Images

### SEL1L Antibody (Center) Blocking peptide - Background

May play a role in Notch signaling (By similarity). May be involved in the endoplasmic reticulum quality control (ERQC) system also called ER-associated degradation (ERAD) involved in ubiquitin-dependent degradation of misfolded endoplasmic reticulum proteins.
