

### DMP4 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP10983b

## **Specification**

### DMP4 Antibody (C-term) Blocking peptide - Product Information

**Primary Accession** 

**08IXL6** 

# DMP4 Antibody (C-term) Blocking peptide - Additional Information

**Gene ID** 56975

#### **Other Names**

Extracellular serine/threonine protein kinase FAM20C, Dentin matrix protein 4, DMP-4, Golgi-enriched fraction casein kinase, GEF-CK, Protein FAM20C, FAM20C, DMP4

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### DMP4 Antibody (C-term) Blocking peptide - Protein Information

Name FAM20C (HGNC:22140)

### **Function**

Golgi serine/threonine protein kinase that phosphorylates secretory pathway proteins within Ser-x-Glu/pSer motifs and plays a key role in biomineralization of bones and teeth (PubMed: <a href="http://www.uniprot.org/citations/22582013" target=" blank">22582013</a>, PubMed:<a href="http://www.uniprot.org/citations/23754375" target="blank">23754375</a>, PubMed:<a href="http://www.uniprot.org/citations/25789606" target="\_blank">25789606</a>). Constitutes the main protein kinase for extracellular proteins, generating the majority of the extracellular phosphoproteome (PubMed: <a href="http://www.uniprot.org/citations/26091039" target=" blank">26091039</a>). Mainly phosphorylates proteins within the Ser-x-Glu/pSer motif, but also displays a broader substrate specificity (PubMed: <a href="http://www.uniprot.org/citations/26091039" target=" blank">26091039</a>). Phosphorylates ERO1A, enhancing its activity which is required to maintain endoplasmic reticulum redox homeostasis and for oxidative protein folding (PubMed:<a href="http://www.uniprot.org/citations/29858230" target=" blank">29858230</a>, PubMed:<a href="http://www.uniprot.org/citations/34349020" target="blank">34349020</a>). During endoplasmic reticulum stress, phosphorylates P4HB/PDIA1 which induces a functional switch, causing P4HB to change from an oxidoreductase to a molecular chaperone (PubMed: <a  $href="http://www.uniprot.org/citations/32149426" target="_blank">32149426</a>). This is$ 

Tel: 858.875.1900 Fax: 858.875.1999

critical to maintain ER proteostasis and reduce cell death under ER stress (PubMed:<a href="http://www.uniprot.org/citations/32149426" target=" blank">32149426</a>). Phosphorylation of P4HB also promotes its interaction with ERN1, leading to reduced activity of ERN1, a key sensor for the endoplasmic reticulum unfolded protein response (PubMed: <a href="http://www.uniprot.org/citations/32149426" target=" blank">32149426</a>). Required for osteoblast differentiation and mineralization (PubMed:<a

href="http://www.uniprot.org/citations/34349020" target=" blank">34349020</a>). Phosphorylates casein as well as a number of proteins involved in biomineralization such as AMELX, AMTN, ENAM and SPP1/OPN (PubMed: <a

href="http://www.uniprot.org/citations/22582013" target=" blank">22582013</a>, PubMed:<a href="http://www.uniprot.org/citations/25789606" target=" blank">25789606</a>, PubMed:<a href="http://www.uniprot.org/citations/34349020" target=" blank">34349020</a>). In addition to its role in biomineralization, also plays a role in lipid homeostasis, wound healing and cell migration and adhesion (PubMed:<a href="http://www.uniprot.org/citations/26091039" target=" blank">26091039</a>).

#### **Cellular Location**

Golgi apparatus membrane; Single-pass type II membrane protein. Secreted. Endoplasmic reticulum. Note=Resides in the Golgi apparatus membrane and is secreted following propeptide cleavage (PubMed:34349020). Retained in the endoplasmic reticulum (ER) in response to ER stress where it phosphorylates P4HB (PubMed:32149426)

**Tissue Location** Widely expressed..

### DMP4 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
