

MFS10 Antibody (Center) Blocking peptide

Synthetic peptide Catalog # BP11346c

Specification

MFS10 Antibody (Center) Blocking peptide - Product Information

Primary Accession

<u>014728</u>

MFS10 Antibody (Center) Blocking peptide - Additional Information

Gene ID 10227

Other Names

Major facilitator superfamily domain-containing protein 10, Tetracycline transporter-like protein, MFSD10, TETRAN

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MFS10 Antibody (Center) Blocking peptide - Protein Information

Name MFSD10

Synonyms TETRAN

Function

Probable organic anion transporter which may serve as a transporter for some non-steroidal anti-inflammatory drugs (NSAIDs) as well as other organic anions across the luminal membranes of renal proximal tubules at the final excretion step into the urine.

Cellular Location

Nucleus inner membrane {ECO:0000250|UniProtKB:Q9D2V8}; Multi-pass membrane protein. Cell membrane; Multi-pass membrane protein

Tissue Location

Expressed in luminal membrane of renal tubules (at protein level) (PubMed:18638446). Detected in all tissues tested with higher expression in heart, splee, kidney, leukocytes and prostate (PubMed:18638446).

MFS10 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

MFS10 Antibody (Center) Blocking peptide - Background

This gene encodes a member of the major facilitatorsuperfamily of transporter proteins. The encoded protein likelyfunctions in efflux of organic anions, including the non-steroidalanti-inflammatory drugs indomethacin and diclofenac. Alternativelyspliced transcript variants have been described. [provided byRefSeq].
