

CFD Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP12089a**Specification**

CFD Antibody (N-term) Blocking peptide - Product Information

Primary Accession [P00746](#)

CFD Antibody (N-term) Blocking peptide - Additional Information

Gene ID 1675

Other Names

Complement factor D, Adipsin, C3 convertase activator, Properdin factor D, CFD, DF, PFD

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CFD Antibody (N-term) Blocking peptide - Protein Information

Name CFD

Synonyms DF, PFD

Function

Factor D cleaves factor B when the latter is complexed with factor C3b, activating the C3bbb complex, which then becomes the C3 convertase of the alternate pathway. Its function is homologous to that of C1s in the classical pathway.

Cellular Location

Secreted.

CFD Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CFD Antibody (N-term) Blocking peptide - Background

The protein encoded by this gene is a member of the trypsin family of peptidases. The encoded protein is a component of the alternative complement pathway best known for its role in humoral suppression of infectious agents. This protein is also a serine protease that is secreted by adipocytes into the bloodstream. Finally, the encoded protein has a high level of expression in fat, suggesting a role for adipose tissue in immune system biology.
