

AQP5 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP12301b**Specification**

AQP5 Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [P55064](#)**AQP5 Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 362**Other Names**

Aquaporin-5, AQP-5, AQP5

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

AQP5 Antibody (C-term) Blocking peptide - Protein Information**Name** AQP5**Function**

Forms a water-specific channel (PubMed:8621489, PubMed:18768791). Plays an important role in fluid secretion in salivary glands (By similarity). Required for TRPV4 activation by hypotonicity. Together with TRPV4, controls regulatory volume decrease in salivary epithelial cells (PubMed:16571723). Seems to play a redundant role in water transport in the eye, lung and in sweat glands (By similarity).

Cellular Location

Apical cell membrane; Multi-pass membrane protein. Cell membrane; Multi-pass membrane protein. Cytoplasmic vesicle membrane; Multi-pass membrane protein Note=Hypotonicity increases location at the cell membrane Phosphorylation decreases location at the cell membrane

Tissue Location

Detected in skin eccrine sweat glands, at the apical cell membrane and at intercellular canaliculi (at protein level).

AQP5 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

AQP5 Antibody (C-term) Blocking peptide - Background

Aquaporin 5 (AQP5) is a water channel protein. Aquaporins are a family of small integral membrane proteins related to the major intrinsic protein (MIP or AQP0). Aquaporin 5 plays a role in the generation of saliva, tears and pulmonary secretions. AQP0, AQP2, AQP5, and AQP6 are closely related and all map to 12q13.
