

**RASAL1 Antibody (Center) Blocking peptide**  
**Synthetic peptide**  
**Catalog # BP12460c****Specification**

---

**RASAL1 Antibody (Center) Blocking peptide - Product Information**Primary Accession [O95294](#)**RASAL1 Antibody (Center) Blocking peptide - Additional Information****Gene ID** 8437**Other Names**

RasGAP-activating-like protein 1, RASAL1, RASAL

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**RASAL1 Antibody (Center) Blocking peptide - Protein Information****Name** RASAL1 ([HGNC:9873](#))**Function**

Probable inhibitory regulator of the Ras-cyclic AMP pathway (PubMed:&lt;a href="http://www.uniprot.org/citations/9751798" target="\_blank"&gt;9751798&lt;/a&gt;). Plays a role in dendrite formation by melanocytes (PubMed:&lt;a href="http://www.uniprot.org/citations/23999003" target="\_blank"&gt;23999003&lt;/a&gt;).

**Tissue Location**

Highly expressed in thyroid and adrenal medulla, lower expression in brain, spinal cord and trachea (PubMed:9751798) Expressed in melanocytes (PubMed:23999003)

**RASAL1 Antibody (Center) Blocking peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**RASAL1 Antibody (Center) Blocking peptide - Background**

The protein encoded by this gene is member of the GAP1 family of GTPase-activating proteins. These proteins stimulate the GTPase activity of normal RAS p21 but not its oncogenic counterpart. Acting as a suppressor of RAS function, the protein enhances the weak intrinsic GTPase activity of RAS proteins resulting in the inactive GDP-bound form of RAS, thereby allowing control of cellular proliferation and differentiation. This particular family member contains domains which are characteristic of the GAP1 subfamily of RasGAP proteins but, in contrast to the other GAP1 family members, this protein is strongly and selectively expressed in endocrine tissues. Alternatively spliced transcript variants that encode different isoforms have been described
