

TM4SF1 Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP12712a**Specification**

TM4SF1 Antibody (N-term) Blocking peptide - Product InformationPrimary Accession [P30408](#)**TM4SF1 Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 4071**Other Names**

Transmembrane 4 L6 family member 1, Membrane component chromosome 3 surface marker 1, Tumor-associated antigen L6, TM4SF1, M3S1, TAAL6

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TM4SF1 Antibody (N-term) Blocking peptide - Protein Information**Name** TM4SF1**Synonyms** M3S1, TAAL6**Cellular Location**

Membrane; Multi-pass membrane protein. Note=Colocalizes with SDCBP2 in the apical region of the cell (PubMed:11102519).

Tissue Location

Highly expressed in lung, breast, colon and ovarian carcinomas. It is also present on some normal cells, endothelial cells in particular

TM4SF1 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TM4SF1 Antibody (N-term) Blocking peptide - Background

The protein encoded by this gene is a member of the tetraspanin family, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface antigen and is highly expressed in different carcinomas.
