

### TM4SF1 Antibody (N-term) Blocking peptide

Synthetic peptide Catalog # BP12712a

### **Specification**

#### TM4SF1 Antibody (N-term) Blocking peptide - Product Information

**Primary Accession** 

P30408

### TM4SF1 Antibody (N-term) Blocking peptide - Additional Information

**Gene ID 4071** 

#### **Other Names**

Transmembrane 4 L6 family member 1, Membrane component chromosome 3 surface marker 1, Tumor-associated antigen L6, TM4SF1, M3S1, TAAL6

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### TM4SF1 Antibody (N-term) Blocking peptide - Protein Information

Name TM4SF1

Synonyms M3S1, TAAL6

#### **Cellular Location**

Membrane; Multi-pass membrane protein. Note=Colocalizes with SDCBP2 in the apical region of the cell (PubMed:11102519).

## **Tissue Location**

Highly expressed in lung, breast, colon and ovarian carcinomas. It is also present on some normal cells, endothelial cells in particular

#### TM4SF1 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

# TM4SF1 Antibody (N-term) Blocking peptide - Background

The protein encoded by this gene is a member of thetransmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface antigen and is highly expressed in different carcinomas.
