

ACOT4 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP12844b**Specification**

ACOT4 Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [Q8N9L9](#)**ACOT4 Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 122970**Other Names**

Acyl-coenzyme A thioesterase 4, Acyl-CoA thioesterase 4, PTE-2b, Peroxisomal acyl coenzyme A thioester hydrolase 1b, Peroxisomal long-chain acyl-CoA thioesterase 1b, PTE-1b, ACOT4, PTE2B, PTEIB

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ACOT4 Antibody (C-term) Blocking peptide - Protein Information**Name** ACOT4**Synonyms** PTE2B, PTEIB**Function**

Catalyzes the hydrolysis of acyl-CoAs into free fatty acids and coenzyme A (CoASH), regulating their respective intracellular levels (PubMed:16940157). Functions as a peroxisomal succinyl-coenzyme A thioesterase that can also hydrolyze glutaryl-CoA and long chain saturated acyl-CoAs (PubMed:16940157).

Cellular Location

Peroxisome.

Tissue Location

Strongest expression in liver and kidney and weaker expression in placenta, heart, and muscle

ACOT4 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ACOT4 Antibody (C-term) Blocking peptide - Background

Acyl-CoA thioesterases are a group of enzymes that catalyze the hydrolysis of acyl-CoAs to the free fatty acid and coenzyme A (CoASH), providing the potential to regulate intracellular levels of acyl-CoAs, free fatty acids and CoASH (By similarity). Succinyl-CoA thioesterase that also hydrolyzes long chain saturated and unsaturated monocarboxylic acyl-CoAs.
